§ 1105. Form and style of work for departments

The Public Printer shall determine the form and style in which the printing or binding ordered by a department is executed, and the material and the size of type used, having proper regard to economy, workmanship, and the purposes for which the work is needed.

Historical and Revision Notes

About This Manual

By act of Congress the Public Printer is authorized to determine the form and style of Government printing. The GPO Style Manual is the product of many years of public printing experience, and its rules are based on principles of good usage and custom in the printing trade.

Editors and writers whose disciplines have taught them aspects of style different from rules followed in this Manual will appreciate the difficulty of establishing a single standard. The GPO Style Manual has served Federal printers since 1894, and with this 30th edition, the traditions of printing and graphic arts are carried forward in the 21st century.

Essentially, the GPO Style Manual is a standardization device designed to achieve uniform word and type treatment, and it aims for economy of word use. Such rules as are laid down for the submission of copy to GPO point to the most economical manner for the preparation and typesetting of manuscript. Following such rules eliminates additional chargeable processing by GPO.

It should be remembered that the GPO Style Manual is primarily a GPO printer’s stylebook. Easy rules of grammar cannot be prescribed, for it is assumed that editors are versed in correct expression. Likewise, decisions on design and makeup are best determined by the individual publisher to meet the needs of the intended audience. As a printer’s book, this Manual necessarily uses terms that are obvious to those skilled in the graphic arts.

Users of the GPO Style Manual should consider it as a general guide. Its rules cannot be regarded as rigid, for the printed word assumes many shapes and variations in type presentation. An effort has been made to provide complete coverage of those elements that enter into the translation of manuscript into type.

The GPO Style Board made significant revisions to update this edition of the GPO Style Manual. The changes include redesigning the format to make it more modern and easier to read; replacing “What is GPO Access?” with “GPO’s Online Initiatives”; removing the atomic weights column from the Chemical Symbols table; expanding and updating time zone abbreviations;
listing additional entries to the Post Office abbreviations; extensively re-
viewing the capitalization chapter to remove outdated entries and include
new ones; realigning the abbreviations lists to create a new list of technical
abbreviations and initialisms; updating old and adding new tables to the
Useful Tables chapter; expanding military titles; creating new sample pages
for the Reports and Hearings chapter; providing many URLs as references;
and including many suggestions by users.

vited. All such correspondence should be addressed as follows:

GPO’s Online Initiatives

Printing continues to serve an important purpose in the Federal Government. Congressional documents, official reports, pamphlets, books, regulations and statutes, passports, tax and census forms, statistical data, and more—in printed form these documents represent a major avenue of communication and information transaction between the Government and the public. In the 21st century, the Government Printing Office (GPO) is committed to providing printed information products for Congress, Federal agencies, and the courts as efficiently, creatively, and cost-effectively as the most modern technology will allow.

With the advent of the electronic information age, GPO has also assumed the responsibility for providing public access to the online versions of most of the official documents it prints, as well as—to the greatest extent possible—the online versions of Government publications that are not printed but are otherwise made available on other Federal Web sites. GPO recognizes that a Federal author today often begins the content creation process at a personal computer, and frequently publishes the final document on the Web, without creating a print version that will make its way to a user’s hands or a library’s shelves. Many Government publications are now born digital and published to the Web, with few if any copies printed for traditional public access via bookstores or libraries.

To accommodate this transition in Federal publishing strategies while preserving the core responsibility for ensuring public access to Government publications, in 1993 Congress enacted Public Law 103–40, the Government Printing Office Electronic Information Access Enhancement Act, which required GPO to establish online access to key Government publications and provide a system of storage to ensure permanent public access to the information they contain. Since then, the number of publications featured by the resulting Web site, GPO Access, at www.gpoaccess.gov, has grown exponentially, as has its use by the public. A decade later the National Archives and Records Administration formally recognized GPO as an affiliated archive for the digital content on the GPO Access site.

To meet continued public demand for online access to Government publications, provide for an increased range of search and retrieval options, and
ensure the preservation of official Government information content in the 21st century, in 2004 GPO embarked on the construction of a more comprehensive online capability, called GPO’s Federal Digital System, or FDsys. Scheduled to become available for public use in late 2008, the new system will serve as GPO’s digital platform for the production, storage, and dissemination of official Government publications for the years to come.

**GPO Access**

Opened to the public in 1994, the *GPO Access* Web site was GPO’s entrance into the digital age. *GPO Access* provides free electronic access to a wealth of important information products produced by the Federal Government. The information provided is the official published version, and information retrieved from *GPO Access* can be used without restriction unless specifically noted. This free service is funded through annual appropriations provided to GPO’s Federal Depository Library Program.

Under the *GPO Access* legislation, the Superintendent of Documents, under the direction of the Public Printer, is required to: (1) Maintain an electronic directory of Federal electronic information; (2) provide a system of online access to the Congressional Record, the Federal Register, and other appropriate publications as determined by the Superintendent of Documents; (3) operate an electronic storage facility for Federal electronic information; and (4) maintain the Federal Bulletin Board, which was then already in existence.

**GPO Access services**

*GPO Access* services are designed to meet the needs of a variety of users. *GPO Access* consists of content and links, including official, full-text information from the three branches of the Federal Government. Databases are updated based on their print equivalent and generally date back to 1994.

Users can find information on the Federal Depository Library Program, which provides no-fee public access to publications disseminated by GPO, regardless of format. *GPO Access* enables users to locate a depository library in their area.
Users may also locate and order publications available for sale through GPO’s Publication and Information Sales Program. Orders may be placed online securely through the U.S. Government Bookstore at http://bookstore.gpo.gov.

Users needing assistance with GPO Access or other dissemination services may direct inquiries to the GPO Contact Center specialists available by email (contactcenter@gpo.gov), telephone (1–866–512–1800), or fax (202–512–2104).

**Authentication of digital documents**

The increasing use of electronic documents poses a special challenge in verifying authenticity, because digital technology makes such documents easy to alter or copy in unauthorized or illegitimate ways.

To help meet this challenge, GPO has implemented digital signatures on certain electronic documents in GPO Access that not only establish GPO as the trusted information disseminator, but also provide the assurance that an electronic document has not been altered since GPO disseminated it.

In early 2008, GPO authenticated the first-ever online Federal budget by digital signature. The visible digital signatures on online PDF documents serve the same purpose as handwritten signatures or traditional wax seals on printed documents. The digital signature verifies document integrity and authenticity for online Federal documents, disseminated by GPO, at no cost to the customer.

**GPO’s Federal Digital System (FDsys)**

A critical part of GPO’s mission of *Keeping America Informed* is ensuring permanent access to published Government documents. GPO is developing a
comprehensive digital content system capable of managing all known Federal Government documents within the scope of GPO’s Federal Depository Library Program and other information dissemination programs. GPO’s Federal Digital System (FDsys) is an integrated content management system which incorporates state-of-the-art technology for document authentication and digital preservation. FDsys supports GPO’s transformation from a print-based environment to a content-based environment, in which digital content is created, submitted, preserved, authenticated, managed, and delivered upon request. The design of FDsys is based on the Reference Model for an Open Archival Information System (OAIS) (ISO 14721:2003), which describes a generalized structure for storing, preserving, and providing access to digital content over time.

FDsys will automate content life-cycle processes and make it easier to deliver digital content in formats suited to customers’ needs. FDsys will allow Federal content creators to submit content for preservation, authentication, and delivery to users. Content entered into the system will be cataloged according to GPO and library standards, and will be available on the World Wide Web for searching and viewing, downloading and printing, as document masters for conventional and on-demand printing, or by other dissemination methods. Content may include text and associated graphics, video, audio, and other forms that emerge.

FDsys capabilities will be deployed in a series of releases. An internal proof-of-concept release of FDsys was completed in September 2007 to support the last stage of testing. FDsys is scheduled to become available to agencies and the public in early 2009, beginning a process of incremental releases. Each release will add functionality to the previous one. The first public release will provide FDsys core capabilities, including such foundational elements as system infrastructure and security, and a digital repository that conforms to the OAIS reference model and enables the management of content and metadata. This release will replace the familiar Wide Area Information Server (WAIS)-based GPO Access, in use since 1994, with enhanced search and retrieval functionality.

For a comprehensive discussion of system capabilities by release, see the FDsys documentation at http://www.gpo.gov/projects/fdsys_documents.htm.
Information
The rules of grammar, spelling, punctuation, and related matters, as stated in this Manual, will serve well when preparing documents for electronic dissemination. Most of the documents currently available via GPO Access are derived from databases used in the printing of Government publications. However, as electronic dissemination of Government information continues to grow, the rules as stated in this Manual will continue to be the GPO’s standard for all document preparation, electronic or otherwise.
1. Advice to Authors and Editors

The GPO Style Manual is intended to facilitate Government printing. Careful observance of the following suggestions will aid in expediting your publication and also reduce printing costs.

1.1. Making changes after submission of copy delays the production of the publication and adds to the expense of the work; therefore, copy must be carefully edited before being submitted to the Government Printing Office.

1.2. Legible copy, not faint reproductions, must be furnished.

1.3. Copy should be on one side only with each sheet numbered consecutively. If both sides of copy are to be used, a duplicate set of copy must be furnished.

1.4. To avoid unnecessary expense, it is advisable to have each page begin with a new paragraph.

1.5. Proper names, signatures, figures, foreign words, and technical terms should be written plainly.

1.6. Chemical symbols, such as Al, Cl, Tl are sometimes mistaken for A1, C1, T1. Editors must indicate whether the second character is a letter or a figure.

1.7. Footnote reference marks in text and tables should be arranged consecutively from left to right across each page of copy.

1.8. Photographs, drawings, and legends being used for illustrations should be placed in the manuscript where they are to appear in the publication. They should be on individual sheets, as they are handled separately during typesetting.

1.9. If a publication is composed of several parts, a scheme of the desired arrangement must accompany the first installment of copy.

1.10. To reduce the possibility of costly blank pages, avoid use of new odd pages and halftitles whenever possible. Generally these refinements should be limited to quality bookwork.
1.11. Samples should be furnished if possible. They should be plainly marked showing the desired type, size of type page, illustrations if any, paper, trim, lettering, and binding.

1.12. In looseleaf or perforated-on-fold work, indicate folio sequence, including blank pages, by circling in blue. Begin with first text page (title). Do not folio separate covers or dividers.

1.13. Indicate on copy if separate or self-cover. When reverse printing in whole or in part is required, indicate if solid or tone.

1.14. Avoid use of oversize fold-ins wherever possible. This can be done by splitting a would-be fold-in and arranging the material to appear as facing pages in the text. Where fold-ins are numerous and cannot be split, consideration should be given to folding and inserting these into an envelope pasted to the inside back cover.

1.15. Every effort should be made to keep complete jobs of over 4 pages to signatures (folded units) of 8, 12, 16, 24, or 32 pages. Where possible, avoid having more than two blank pages at the end.

1.16. Indicate alternative choice of paper on the requisition. Where possible, confine choice of paper to general use items carried in inventory as shown in the GPO Paper Catalog.

1.17. If nonstandard trim sizes and/or type areas are used, indicate head and back margins. Otherwise, GPO will determine the margins.

1.18. Customers should submit copy for running heads and indicate the numbering sequence for folios, including the preliminary pages.

1.19. Corrections should be made on first proofs returned, as later proofs are intended for verification only. All corrections must be indicated on the “R” (revise) set of proofs, and only that set should be returned to GPO.

1.20. Corrections should be marked in the margins of a proof opposite the indicated errors, not by writing over the print or between the lines. All queries on proofs must be answered.
1.21. The following GPO publications relate to material included in this Manual. They may be purchased from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

**Word Division: Supplement to the United States Government Printing Office Style Manual**

This publication serves as a quick reference guide for finding correct word divisions, as well as a spelling and pronunciation guide. In addition to the list of words with divisions, it also contains wordbreak rules and line-ending rules. Prepared especially for GPO printers and proofreaders, this supplement is equally useful for keyboarding. 1987.

**Government Paper Specifications**

The purpose of these standards is to achieve compliance with relevant statutes regarding printing papers; address environmental, workplace safety, and paper longevity issues; and achieve maximum savings in the Government’s paper purchases. 2008.

**GPO Paper Samples**

This publication is a supplement to Government Paper Specification Standards. It includes samples of papers used by GPO. Used as a planning aid and guide in selecting an adequate grade, weight, and color of paper for a job of printing. 2008.

\(^1\) In lieu of the traditional mark “tr” used to indicate letter or number transpositions, the striking out of the incorrect letters or numbers and the placement of the correct matter in the margin of the proof is the preferred method of indicating transposition corrections.

\(^2\) Corrections involving more than two characters should be marked by striking out the entire word or number and placing the correct form in the margin. This mark should be reserved to show transposition of words.

\(^3\) The form of any query carried should be such that an answer may be given simply by crossing out the complete query if a negative decision is made or the right-hand (question mark) portion to indicate an affirmative answer.
It does not appear that the earliest printers had any method of correcting errors before the form was on the press. The learned correctors of the first two centuries of printing were not proofreaders in our sense, they were rather what we should term office editors. Their labors were chiefly to see that the proof corresponded to the copy, but that the printed page was correct in its latinity—that the words were there, and that the sense was right. They cared but little about orthography, bad letters, or purely printer's errors, and when the text seemed to them wrong they consulted fresh authorities or altered it on their own responsibility. Good proofs in the modern sense, were impossible until professional readers were employed—men who had first a printer's education, and then spent many years in the correction of proof. The orthography of English, which for the past century has undergone little change, was very fluctuating until after the publication of Johnson's Dictionary, and capitals, which have been used with considerable regularity for the past 80 years, were previously used on the miss or hit plan. The approach to regularity, so far as we have it, may be attributed to the growth of a class of professional proofreaders, and it is to them that we owe the correctness of modern printing. More errors have been found in the Bible than in any other one work. For many generations it was frequently the case that Bibles were brought out stealthily, from fear of governmental interference. They were frequently printed from imperfect texts, and were often modified to meet the views of those who published them. The story is related that a certain woman in Germany, who was the wife of a printer, had become disgusted with the continual assertions of the superiority of man over woman which she had heard, hurried into the composing room while her husband was at supper and altered a sentence in the Bible, which he was printing, so that it read 'Herr' instead of 'Herr,' thus making the verse read 'And he shall be thy lord.' The word was omitted by Barker, the king's printer in England in 1632, in printing the seventh commandment. He was fined £100 on this account.

Note.—The system of marking proofs can be made easier by the use of an imaginary vertical line through the center of the type area. The placement of corrections in the left-hand margin for those errors found in the left-hand portion of the proof and in the right-hand margin for right-side errors prevents overcrowding of marks and facilitates corrections.

- Caret—General indicator used to mark position of error.

1. In lieu of the traditional mark “tr” used to indicate letter or number transpositions, the striking out of the incorrect letters or numbers and the placement of the correct matter in the margin of the proof is the preferred method of indicating transposition corrections.

2. Corrections involving more than two characters should be marked by striking out the entire word or number and placing the correct form in the margin. This mark should be reserved to show transposition of words.

3. The form of any query carried should be such that an answer may be given simply by crossing out the complete query if a negative decision is made or the right-hand (question mark) portion to indicate an affirmative answer.
It does not appear that the earliest printers had any method of correcting errors before the form was on the press. The learned correctors of the first two centuries of printing were not proofreaders in our sense; they were rather what we should term office editors. Their labors were chiefly to see that the proof corresponded to the copy, but that the printed page was correct in its latinity—that the words were there, and not in its orthography, bad letters, or purely printer's errors, and when the text seemed to them wrong they consulted fresh authorities or altered it on their own responsibility. Good proofs in the modern sense, were impossible until professional readers were employed—men who had first a printer's education, and then spent many years in the correction of proof. The orthography of English, which for the past century has undergone little change, was very fluctuating until after the publication of Johnson's Dictionary, and capitals, which have been used with considerable regularity for the past 80 years, were previously used on the miss or hit plan. The approach to regularity, so far as we have, may be attributed to the growth of a class of professional proofreaders, and it is to them that we owe the correctness of modern printing. More errors have been found in the Bible than in any other work. For many generations it was frequently the case that Bibles were brought out stealthily, from fear of governmental interference. They were frequently printed from imperfect texts, and were often modified to meet the views of those who published them. The story is related that a certain woman in Germany, who was the wife of a printer, had become disgusted with the continual assertions by the superiority of man over woman which she had heard, hurried into the composing room while her husband was at supper and altered a sentence in the Bible, which he was printing, so that it read Herr instead of Herr, thus making the verse read "And he shall be thy lord." The word was omitted by Barker, the king's printer in England in 1632, in printing the seventh commandment. He was fined £1000 on this account.

Note.—The system of marking proofs can be made easier by the use of an imaginary vertical line through the center of the type area. The placement of corrections in the left-hand margin for those errors found in the left-hand portion of the proof and in the right-hand margin for right-side errors prevents overcrowding of marks and facilitates corrections.
2. General Instructions

Job planning

2.1. The use of computers has dramatically altered every phase of the printing industry beginning with the basic planning of each new job. New publications are evaluated by application specialists who review their requirements and design the necessary formats. Each format is made to conform exactly to the copy’s specifications for page dimensions, line length, indentions, typefaces, etc. Upon completion, sample pages are produced and submitted to the customer. At this time, customer agencies are requested to indicate precise details of any style changes because this set of pages serves as a guide for the copy preparer, the beginning of actual production.

2.2. In recent years, changes in the needs of the library community have led to a move toward uniform treatment of the component parts of publications. In developing standards to guide publishers of Government documents, consideration has been given to the changing needs of those who seek to produce, reference, index, abstract, store, search, and retrieve data. Certain identifying elements shall be printed on all publications in accordance with this Manual and with standards developed by the (ANSI) American National Standards Institute.

Publications such as books and pamphlets should contain:
(a) Title and other title information;
(b) Name of department issuing or creating publication;
(c) Name of author(s) and editor(s) (department or individual);
(d) Date of issuance;
(e) Availability (publisher, printer, or other source and address);
(f) Superintendent of Documents classification and stock numbers if applicable; and

(See ANSI Standard Z39.15, Title Leaves of a Book.)

Reports of a scientific or technical nature should contain:
(a) Title and other title information;
(b) Report number;

(See ANSI Standard Z39.1, American Standard Reference Data and Arrangement of Periodicals.)

**Makeup**

2.3. The design and makeup of a publication is the responsibility of the publisher. However, when the following elements occur in Government publications, they generally appear in the sequence listed below. The designation “new odd page” generally refers to bookwork and is not required in most pamphlet- and magazine-type publications.

(a) *Frontispiece*, faces title page.

(b) *False title* (frontispiece, if any, on back).

(c) *Title page* (new odd page).
(d) *Back of title*, blank, but frequently carries such useful bibliographic information as list of board members, congressional resolution authorizing publication, note of editions and printings, GPO imprint if departmental imprint appears on title page, sales notice, etc.

(e) *Letter of transmittal* (new odd page).

(f) *Foreword*, differs from a preface in that it is an introductory note written as an endorsement by a person other than the author (new odd page). An introduction differs from a foreword or a preface in that it is the initial part of the text; if the book is divided into chapters, it should be the first chapter.

(g) *Preface*, by author (new odd page).

(h) *Acknowledgments* (if not part of preface) (new odd page).

(i) *Contents* (new odd page), immediately followed by list of illustrations and list of tables, as parts of contents.

(j) *Text*, begins with page 1 (if halftitle is used, begins with p. 3).

(k) *Glossary* (new odd page).

(l) *Bibliography* (new odd page).

(m) *Appendix* (new odd page).

(n) *Index* (new odd page).

2.4. Preliminary pages use small-cap Roman numerals. Pages in the back of the book (index, etc.), use lowercase Roman numerals.

2.5. Booklets of 32 pages or less can be printed more economically with a self-cover. A table of contents, title page, foreword, preface, etc., is not usually necessary with so few pages. If some of this preliminary matter is necessary, it is more practical if combined; i.e., contents on cover; contents, title, and foreword on cover 2, etc.

2.6. Widow lines (lines less than full width of measure) at top of pages are to be avoided, if possible, but are permitted if absolutely necessary to maintain uniform makeup and page depth. Rewording to fill the line is a preferred alternative.
2.7. Paragraphs may start on the last line of a page whenever necessary. If it is found necessary to make a short page, the facing page should be of approximate equal depth.

2.8. A blank space or sink of 6 picas should be placed at the head of each new odd or even page of 46-pica or greater depth; pages with a depth of from 36 to 45 picas, inclusive, will carry a 5-pica sink; pages less than 36 picas, 4 picas.

2.9. When top centered folios are used, the folio on a new page is set 2 points smaller than the top folios. They are centered at the bottom and enclosed in parentheses.

2.10. Where running heads with folios are used, heads are included in overall page depth. However, first pages of chapters and pages with bottom folios do not include the folios as part of the overall page depth.

2.11. Jobs that have both running heads and bottom folios or just bottom folios will align all of the page numbers on the bottom in the margin, including those on preliminary pages. If at all possible avoid use of running heads in conjunction with bottom folios.

2.12. Contents, list of illustrations, preface, or any other matter that makes a page in itself will retain normal 6-pica sink.

2.13. Footnote references are repeated in boxheads or in continued lines over tables, unless special orders are given not to do so.

2.14. When a table continues, its headnote is repeated without the word Continued.

2.15. A landscape or broadside table that continues from an even to an odd page must be positioned to read through the center (gutter) of the publication when its size is not sufficient to fill both pages.

2.16. A broadside table of less than page width will center on the page.

2.17. Centerheads, whether in boldface, caps, caps and small caps, small caps, or italic, should have more space above than below. Uniform spacing should be maintained throughout the page.
2.18. In making up a page of two or more columns, text preceding a page-width illustration will be divided equally into the appropriate number of columns above the illustration.

2.19. Two or more short footnotes may be combined into one line, with 2 ems of space between.

1 Preliminary.  
2 Including imported cases.  
3 Imported.

2.20. All backstrips should read down (from top to bottom).

Copy preparation

2.21. At the beginning of each job the proper formats must be plainly marked. New Odd or New Page, Preliminary, Cover, Title, or Back Title should also be plainly indicated.

2.22. Copy preparers must mark those things not readily understood when reading the manuscript. They must also mark the correct element identifier code for each data element, as well as indicate other matters of style necessary to give the publication good typographic appearance.

2.23. Preparers must indicate the proper subformat at the beginning of each extension, verify folio numbers, and plainly indicate references, footnotes, cut-ins, etc. Unless otherwise marked, text matter will be set in 10-point solid and tables in 7 point. In tables utilizing down rules, unless a specific weight is requested by the customer, hairline rules will be used. (See rule 13.3.)

2.24. Quoted or extract matter and lists should be set smaller than text with space above and below. Quotation marks at the beginning and end of paragraphs should be omitted. If the same type size is used, quoted matter should be indented 2 ems on both sides with space top and bottom, and initial and closing quotes should be omitted.

Capitalization

2.25. Unusual use of capital and lowercase letters should be indicated by the customer to guarantee correct usage.
Datelines, addresses, and signatures
2.26. Copy preparers must mark caps, small caps, italic, abbreviations, indentions, and line breaks where necessary. (For more detailed instructions, see Chapter 16 “Datelines, Addresses, and Signatures.”)

Decimals and common fractions
2.27. In figure columns containing both decimals and common fractions, such decimals and/or fractions will not be aligned. The columns will be set flush right.

“Et cetera,” “etc.,” and “and so forth”
2.28. In printing a speaker’s language, the words and so forth or et cetera are preferred, but in “FIC & punc.” matter etc., is acceptable. If a quoted extract is set in type smaller than that of the preceding text and the speaker has summed up the remainder of the quotation with the words and so forth or et cetera, these words should be placed at the beginning of the next line, flush and lowercase, and an em dash should be used at the end of the extract.

Folioing and stamping copy
2.29. Folio numbers should be placed in the upper right corner, preferably half an inch from the top.

Headings
2.30. The element identifier codes to be used for all headings must be marked. Caps, caps and small caps, small caps, caps and lowercase, lowercase first up (first word and proper nouns capitalized), or italic must be prepared. (See rule 3.49.)

Pickup
2.31. The jacket number of a job from which matter is to be picked up must be indicated. New matter and pickup matter should conform in style.
Sidenotes and cut-in notes

2.32. Sidenotes and cut-in notes are set each line flush left and ragged right, unless otherwise prepared, and are always set solid. Sidenotes are usually set in 6 point, 4½ picas wide. Footnotes to sidenotes and text should be set 21½ picas.

An alleged violation of the rule relating to admission to the floor presents a question of privilege (III, 2624, 2625; VI, 579), but not a higher question of privilege than an election case (III, 2626). In one case where an ex-Member was abusing the privilege * * *.

Signs, symbols, etc.

2.33. All signs, symbols, dashes, superiors, etc., must be plainly marked. Names of Greek letters must be indicated, as they are frequently mistaken for italic or symbols.

2.34. Some typesetting systems produce characters that look the same as figures. A lowercase l resembles a figure 1 and a capital O looks like a figure 0. Questionable characters will be printed as figures unless otherwise marked.

Letters illustrating shape and form

2.35. Capital letters of the text face will be used to illustrate shape and form, as U-shape(d), A-frame, T-bone, and I-beam.

2.36. Plurals are formed by adding an apostrophe and the letter s to letters illustrating shape and form, such as T’s and Y’s. Golf tee(s) should be spelled, as shape is not indicated.

2.37. A capital letter is used in U-boat, V-8, and other expressions which have no reference to shape or form.

Fol. lit. and FIC & punc.

2.38. After submittal to GPO, manuscript copy is rubber-stamped “Fol. lit.” or “FIC & punc.” The difference between these two typesetting instructions is explained thus:

Copy is followed when stamped “Fol. lit.” (follow literally). Copy authorized to be marked “Fol. lit.” must be thoroughly prepared by the requisitioning agency as to capitalization, punctuation (including...
compounding), abbreviations, signs, symbols, figures, and italic. Such copy, including even obvious errors, will be followed. The lack of preparation on copy so designated shall, in itself, constitute preparation. “Fol. lit.” does not include size and style of type or spacing.

Obvious errors are corrected in copy marked “FIC & punc.” (follow, including capitalization and punctuation).

2.39. In congressional hearings, the name of the interrogator or witness who continues speaking is repeated following a head set in boldface, a paragraph enclosed in parentheses, and a paragraph enclosed in brackets.

In a head set in boldface, the title “Mr.” is not used, and “the Honorable” preceding a name is shortened to “Hon.” Street addresses are also deleted. Example: “Statement of Hon. John P. Blank, Member, American Bar Association, Washington, DC.”

2.40. Paragraph or section numbers (or letters) followed by figures or letters in parentheses will close up, as “section 7(B)(1)(a),” “paragraph 23(a),” “paragraph b(7),” “paragraph (a)(2); but “section 9(a) (1) and (2),” “section 7 a and b”. In case of an unavoidable break, division will be made after elements in parentheses, and no hyphen is used.

2.41. Bill style.—Bill copy will be followed as supplied. Bills will be treated as “FIC & punc.” This data is transmitted to the GPO via fiber optic transmission with element identifier codes in place. Therefore, it is not cost effective to prepare the manuscript as per the GPO Style Manual and update the data once it is in type form.

2.42. Copy preparer’s instructions, which accompany each job, are written to cover the general style and certain peculiarities or deviations from style. These instructions must be followed.

Abbreviations

2.43. In marking abbreviations to be spelled, preparers must show what the spelled form should be, unless the abbreviations are common and not susceptible to more than one construction. An unfamiliar abbreviation, with spelled-out form unavailable, is not changed.
Type composition

2.44. Operators and revisers must study carefully the rules governing composition.

2.45. In correcting pickup matter, the operator must indicate plainly on the proof what portion, if any, was actually reset.

2.46. Every precaution must be taken to prevent the soiling of proofs, as it is necessary for the reviser to see clearly every mark on the margin of a proof after it has been corrected.

2.47. Corrections of queries intended for the author are not to be made. Such queries, however, are not to be carried on jobs going directly to press.

Leading and spacing

2.48. Spacing of text is governed by the leading, narrow spacing being more desirable in solid than in leaded matter.

2.49. A single justified word space will be used between sentences. This applies to all types of composition.

2.50. Center or flush heads set in caps, caps and small caps, small caps, or boldface are keyed with regular justified spaces between words.

2.51. Centerheads are set apart from the text by the use of spacing. The amount of space varies with each publication. However, more space is always inserted above a heading than below. In 10-point type, the spacing would be 10 points over and 8 points under a heading; in 8- and 6-point type, the spacing would be 8 points above and 6 points below.

2.52. Solid matter (text) is defined as those lines set without horizontal space between them. Leaded text is defined as lines separated by 1 or 2 points of space.

2.53. Unless otherwise marked, flush heads are separated from text by 4 points of space above and 2 points of space below in solid matter, and by 6 points of space above and 4 points of space below in leaded matter.
2.54. Full-measure numbered or lettered paragraphs and quoted extracts are not separated by space from adjoining matter.

2.55. Extracts which are set off from the text by smaller type or are indented on both sides or indented 3 ems on the left side (courtwork only) are separated by 6 points of space in leaded matter and by 4 points of space in solid matter.

2.56. Extracts set solid in leaded matter are separated from the text by 6 points.

2.57. Flush lines following extracts are separated by 6 points of space in leaded matter and by 4 points in solid matter.

2.58. Footnotes are leaded if the text is leaded, and are solid if the text is solid.

2.59. Legends are leaded if the text is leaded, and solid if the text is solid. Leaderwork is separated from text by 4 points above and 4 points below.

Indentions

2.60. In measures less than 30 picas, the paragraph indentation is 1 em. Paragraph indentions in cut-in matter are 3 ems, overs are 2 ems. Datelines and signatures are indented in multiples of 2 ems. Addresses are set flush left.

2.61. In matter set 30 picas or wider, the paragraph indentation is 2 ems. Paragraph indentions in cut-in matter are 6 ems, overs are 4 ems. Datelines and signatures are indented in multiples of 2 ems. Addresses are set flush left.

2.62. In measures less than 30 picas, overruns in hanging indentions are 1 em more than the first line, except that to avoid conflict with a following indentation (for example, of a subentry or paragraph), the overrun indentation is made 1 em more than the following line.

2.63. In matter set 30 picas or wider, overruns in hanging indentions are 2 ems more than the first line, except that to avoid conflict with a following indentation (for example, of a subentry or paragraph), the overrun indentation is made 2 ems more than the following line.
2.64. Indention of matter set in smaller type should be the same, in points, as that of adjoining main-text indented matter.

2.65. Two-line centerheads are centered, but heads of three or more lines are set with a hanging indention.

2.66. Overs in flush heads are indented 2 ems in measures less than 30 picas, and 3 ems in wider measures.

Legends for illustrations

2.67. It is preferred that legends and explanatory data consisting of one or two lines are set centered, while those with more than two lines are set with a hanging indention. Legends are set full measure regardless of the width of the illustration. Paragraph style is acceptable.

2.68. Legend lines for illustrations that appear broad or turn page (landscape) should be printed to read up; an even-page legend should be on the inside margin and an odd-page legend on the outside margin.

2.69. Unless otherwise indicated, legends for illustrations are set in 8-point roman, lowercase.

2.70. Periods are used after legends and explanatory remarks beneath illustrations. However, legends without descriptive language do not use a period. (See rule 8.112.)

2.71. At the beginning of a legend or standing alone, Figure preceding the identifying number or letter is set in caps and small caps and is not abbreviated.

Figure 5, not Fig. 5

2.72. If a chart carries both a legend and footnotes, the legend is placed above the chart.

2.73. Letter symbols used in legends for illustrations are set in lowercase italic without periods.

Proofreading

2.74. All special instructions, layouts, and style sheets must be included with the first installment of each job.
2.75. If the proofreader detects inconsistent or erroneous statements, it is his or her responsibility to query them.

2.76. If the grammatical construction of a sentence or clause is questioned by a proofreader and it seems desirable to change the form, he or she must indicate the proposed correction, add a query mark, and enclose all in a circle.

2.77. All queries appearing on the copy must be carried to the author's set of proofs.

2.78. Proofs that are illegible or are in any manner defective must be called to the attention of the deskperson.

2.79. The manner in which correction marks are made on a proof is of considerable importance. Straggling, unsymmetrical characters, disconnected marks placed in the margin above or below the lines to which they relate, irregular lines leading from an incorrect letter or word to a correction, large marks, marks made with a blunt pencil, indistinct marks, and frequent use of the eraser to obliterate marks hastily or incorrectly made are faults to be avoided.

2.80. In reading proof of wide tables, the proofreader should place the correction as near as possible to the error. The transposition mark should not be used in little-known words or in figures. It is better to cancel the letters or figures and write them in the margin in the order in which they are to appear.

2.81. To assure proper placement of footnotes, the proofreader and reviser must draw a ring around footnote references on the proofs, then check off each corresponding footnote number.

2.82. Proofreaders must not make important changes in indentions or tables without consulting the referee.

2.83. The marks of the copy preparer will be followed, as he or she is in a position to know more about the peculiarities of a job than one who reads but a small portion of it.

2.84. Any mark that will change the proof from the copy as prepared must be circled in the margin.

2.85. All instructions on copy must be carried on proof by readers.
2.86. Folios of copy must be run by the proofreader and marked on the proof.

2.87. All instructions, comments, and extraneous notes on both copy and proofs that are not intended to be set as part of the text must be circled.

Revising galley proofs
2.88. The importance of revising proofs cannot be overemphasized. Although a reviser is not expected to read proof, it is not enough to follow the marks found on the proof. He or she should be alert to detect errors and inconsistencies and must see that all corrections have been properly made and that words or lines have not been transposed or eliminated in making the corrections.

2.89. A reviser must not remodel the punctuation of the proofreaders or make any important changes. If an important change should be made, the reviser must submit the proposed change to the supervisor for a decision.

2.90. In the body of the work, new pages must be properly indicated on the proof. (For new page information, see rule 2.3 “Makeup.”)

2.91. All instructions and queries on proofs must be transferred to the revised set of proofs.

Revising page proofs
2.92. Page revising requires great diligence and care. The reviser must see that the rules governing the instructions of previous workers have been followed.

2.93. The reviser is responsible for marking all bleed and off-center pages.

2.94. A blank page must be indicated at the bottom of the preceding page.

2.95. Special care must be exercised in revising corrected matter. If it appears that a correction has not been made, the reviser should
carefully examine each line on the page to see if the correction was inserted in the wrong place.

2.96. The following rules must be carefully observed:

(a) See that the proof is clean and clear; request another if necessary.

(b) Verify that the galley proofs are in order and that the data on the galleys runs in properly to facilitate continuous makeup.

(c) Make sure that different sets of proofs of the same job are correctly marked in series ("R," "2R," "3R," etc.); where a sheet is stamped “Another proof,” carry the same designating “R” on the corresponding clean proof. Advance the “R,” “2R,” “3R,” etc., on each set of page proofs returned from the originating office.

(d) Run the page folios, make sure they are consecutive and that the running heads, if used, are correct. Check connection pages. Verify correct sequence for footnote references and placement. It is imperative that footnotes appear or begin on the same page as their reference, unless style dictates that all footnotes are to appear together in one location.

(e) Watch for dropouts, doublets, and transpositions.

(f) Legend lines of full-page illustrations that appear broad should be printed to read up—the even-page legend on the binding or inside margin and the odd-page legend on the outside margin.

(g) If a footnote is eliminated, do not renumber the footnotes; change footnote to read “Footnote eliminated.”

2.97. If a footnote is added in proof, use the preceding number with a superior letter added, as 15a.

2.98. Where a table with footnotes falls at the bottom of a page containing footnotes to text, print the table footnotes above the text footnotes, separated by a rule 50 points long, flush left, with spacing on each side of the rule. (See also rule 13.77.)
**Press revising**

**2.99.** Press revising calls for the exercise of utmost care. The press reviser must be thoroughly familiar with the style and makeup of Government publications. He or she is required to OK all forms that go to press—bookwork, covers, jobwork, etc.—and must see that all queries are answered. A knowledge of the bindery operations required to complete a book or job and familiarity with all types of imposition, folds, etc., is helpful. The reviser must be capable of ascertaining the proper head, back, and side margins for all work, to ensure proper trimming of the completed job.

**2.100.** Although speed is essential when forms reach the press reviser, accuracy is still paramount and must not be sacrificed.

**Signature marks, etc.**

**2.101.** Unless otherwise indicated, signature marks are set in 6-point lowercase and indented 3 ems.

**2.102.** Figures indicating the year should follow the jacket number in signature marks:

- 125–327—08—4
- 116–529—08—vol. 1—3
- 116–529—08—pt. 5—3

**2.103.** When the allmark (⊙) and signature or the imprint and signature appear on same page, the signature line is placed below the allmark or imprint. (See rule 2.117.)

**2.104.** The allmark is placed below the page, bulletin, or circular number but above the signature line, if both appear on the same page.

**2.105.** Imprints and signature lines appearing on short pages of text are placed at the bottom of the page.

**2.106.** On a congressional job reprinted because of change, the House and Senate have approved the following styles:

- **House of Representatives:**
  - ★17–234—08—2

- **Senate:**
  - 17–235—08—2 ★(Star Print)
2.107. The following forms are used for signature marks in House and Senate documents and reports printed on session jackets:

- H. Doc. 73, 08–1—2
- S. Doc. 57, 08–1—2
- S. Doc. 57, 08–2, pt. 1—2
- S. Doc. 57, 08–2, vol. 1—2
- H. Rept. 120, 08–2—8
- S. Rept. 100, 08–2—9

2.108. In a document or report printed on other than a session jacket, use the jacket number, year, and signature number only, omitting the document or report number. (See rule 2.102.)

2.109. For pasters, the jacket number, the year, and the page to be faced by the paster are used as follows (note punctuation):

- 12–344—08 (Face p. 10)

2.110. On a paster facing an even page, the marks are placed on the lower right-hand side; on a paster facing an odd page, the marks are placed on the lower left-hand side.

2.111. If more than one paster faces the same page, each is numbered as follows:

- 12–344—08 (Face p. 19) No. 1
- 12–344—08 (Face p. 19) No. 2

2.112. When a paster follows the text, the allmark is placed on the last page of the text and never on the paster.

Reprints

2.113. To aid bibliographic identification of reprints or revisions, the dates of the original edition and of reprint or revision should be supplied by the author on the title page or in some other suitable place. Thus:

- First edition July 1990
- Reprinted July 1995
- First printed June 1990
- Revised June 1995

- Original edition May 1990
- Reprinted May 1995
- Revised July 1997

2.114. The year in the imprint on cover, title page, or elsewhere is not changed from that in the original print, nor are the signatures changed, unless other mends are necessary.
Imprints

2.115. Unless otherwise stipulated, the GPO imprint must appear on all printed matter, with the exception of certain classified work.

2.116. The full GPO imprint is used on the title page of a congressional speech.

2.117. The imprint and allmark are not used together on any page; if one is used, the other is omitted.

Therefore the example would read:

Another Government periodical citation would read as follows:

Clarity may be maintained by capitalizing each word in book titles, but only the first word in the title of articles.

Other examples are:

Edward B. Rosa, “The economic importance of the scientific work of the government,” *J. Wash. Acad. Sci.* 10, 342 (1920)

or:

Note that the principal words in both book titles and titles of articles are capitalized. Consistency is more important in bibliographic style than the style itself.

The science of bibliography is covered in many texts, and the following references are available for study:

3. Capitalization Rules
(See also Chapter 4 “Capitalization Examples” and Chapter 9 “Abbreviations and Letter Symbols”)

3.1. ### 5. Spelling

(See also Chapter 7 “Compounding Examples” and Chapter 9 “Abbreviations and Letter Symbols”)

5.1. GPO uses Webster’s Third New International Dictionary as its guide for the spelling of words not appearing in the GPO Style Manual. Colloquial and dialect spellings are not used unless required by the subject matter or specially requested. The tendency of some producers of computer-assisted publications to rely on the limited capability of some spell-checking programs adds importance to this list.

#### Preferred and difficult spellings

5.2. In addition to indicating the preferred forms of words with variant spellings, the list also contains other words frequently misspelled or causing uncertainty. (See also “Word Division,” a supplement to the GPO Style Manual.)

### Endings “ise,” “ize,” and “yze”

5.12. A large number of words have the termination *ise*, *ize*, or *yze*. The letter *l* is followed by *yze* if the word expresses an idea of loosening or separating, as *analyze*; all other words of this class, except those ending with the suffix *wise* and those in the following list, end in *ize*.

### Endings “cede,” “ceed,” and “sede”

5.13. Only one word ends in *sede* (supersede); only three end in *ceed* (exceed, proceed, succeed); all other words of this class end in *cede* (precede, secede, etc.).
Doubled consonants

5.14. A single consonant following a single vowel and ending in a monosyllable or a final accented syllable is doubled before a suffix beginning with a vowel.

- travel, traveled, traveling

5.15. If the accent in a derivative falls upon an earlier syllable than it does in the root word, the consonant is not doubled.

- refer, reference
- prefer, preference
- infer, inference

Indefinite articles

5.16. The indefinite article a is used before a consonant and an aspirated h; an is used before a silent h and all vowels except u pronounced as in visual and o pronounced as in one.

- a historic occasion
- a hotel
- a human being
- a humble man
- a union
- an herbseller
- an hour

5.19. Use of the indefinite article a or an before a numerical expression is determined by the consonant or vowel sound of the beginning syllable.

- an 11-year-old
- an onetime winner
- a III (three) group
- an VIII (eight) classification
- a IV–F (four ef) category (military draft)
- a 4–H Club
Geographic names

5.20. The spelling of geographic names must conform to the decisions of the U.S. Board on Geographic Names (BGN) (http://geonames.usgs.gov). In the absence of such a decision, the U.S. Directory of Post Offices is to be used.

5.21. If the decisions or the rules of the BGN permit the use of either the local official form or the conventional English form, it is the prerogative of the originating office to select the form that is most suitable for the matter in hand; therefore, in marking copy or reading proof, it is required only to verify the spelling of the particular form used. GPO’s preference is for the conventional English form. Copy will be followed as to accents, but these should be consistent throughout the entire job.

Nationalities, etc.

5.22. The table on Demonyms in Chapter 17 “Useful Tables” shows forms to be used for nouns and adjectives denoting nationality.

5.23. In designating the natives of the States, the following forms will be used.

**Native American words**

5.25. Words, including tribal and other proper names of Indian, Aleut, Hawaiian, and other groups, are to be followed literally as to spelling and the use of spaces, hyphens, etc.

**Transliteration**

5.26. In the spelling of nongeographic words transliterated from Chinese, Japanese, or any other language that does not have a Latin alphabet, copy is to be followed literally.
6. Compounding Rules
(See also Chapter 7 “Compounding Examples”)

6.1. A compound word is a union of two or more words, either with or without a hyphen. It conveys a unit idea that is not as clearly or quickly conveyed by the component words in unconnected succession. The hyphen is a mark of punctuation that not only unites but also separates the component words; it facilitates understanding, aids readability, and ensures correct pronunciation. When compound words must be divided at the end of a line, such division should be made leaving prefixes and combining forms of more than one syllable intact.

6.2. In applying the rules in this chapter and in using the list of examples in the following chapter, “Compounding Examples,” the fluid nature of our language should be kept in mind. Word forms constantly undergo modification. Although it is often the case that hyphenated compound words eventually lose their hyphen, many of them start out unhyphenated.

6.3. The rules, therefore, are somewhat flexible. Exceptions must necessarily be allowed. Current language trends continue to point to closing up certain words which, through either frequent use or widespread dissemination through modern media exposure, have become fixed in the reader’s mind as units of thought. The tendency to merge two short words continues to be a natural progression toward better communication.

General rules

6.4. In general, omit the hyphen when words appear in regular order and the omission causes no ambiguity in sense or sound.

- banking hours
- blood pressure
- book value
- census taker
- day laborer
- eye opener
- fellow citizen
- living costs
- palm oil
- patent right
- real estate
- rock candy
- training ship
- violin teacher
6.5. Words are usually combined to express a literal or nonliteral (figura-
tive) unit idea that would not be as clearly expressed in unconnected
succession.

- afterglow
- bookkeeping
- cupboard
- forget-me-not
- gentleman
- newsprint
- right-of-way
- whitewash

6.6. A derivative of a compound retains the solid or hyphenated form of
the original compound unless otherwise indicated.

- coldbloodedness
- footnoting
- ill-advisedly
- outlawry
- praiseworthy
- railroader
- Y-shaped

6.7. A hyphen is used to avoid doubling a vowel or tripling a consonant,
est except after the short prefixes co, de, pre, pro, and re, which are gen-
erally printed solid. (See also rules 6.29 and 6.32.)

- cooperation
- deemphasis
- preexisting
- anti-inflation
- micro-organism
- semi-independent
- brass-smith
- Inverness-shire
- thimble-eye
- ultra-atomic
- shell-like
- hull-less
- but
- co-occupant
- cross section

6.8. Print solid two nouns that form a third when the compound has
only one primary accent, especially when the prefixed noun consists
of only one syllable or when one of the elements loses its original
accent.

- airship
- cupboard
- footnote
- bathroom
- dressmaker
- locksmith
- bookseller
- fishmonger
- workman

6.9. Print solid a noun consisting of a short verb and an adverb as its sec-
ond element, except when the use of the solid form would interfere
with comprehension.

- blowout
- breakdown
- hangover
- holdup
- makeready
- markoff
- pickup
- builddown
- cooldown
- runoff
- setup
- showdown
- throwaway
- tradeoff
- flareback
- giveaway
- but
- cut-in
- phase-in
- run-in
- sit-in

Solid compounds
6.10. Compounds beginning with the following nouns are usually printed solid.

<table>
<thead>
<tr>

<td>play</td>
<td>way</td>
</tr>
<tr>
<td>horse</td>
<td>school</td>

<tr>

</tbody>
</table>

6.11. Compounds ending in the following are usually printed solid, especially when the prefixed word consists of one syllable.

<table>
<thead>
<tr>
<th>berry</th>

<tbody>
<tr>
<td>bird</td>

6.12. Print solid *any, every, no, and some* when combined with *body, thing, and where*. When *one* is the second element, print as two words if meaning a single or particular person or thing. To avoid mispronunciation, print *no one* as two words at all times.

anybody everywhere somebody
anything everyone something
anywhere nobody somewhere
anyone nothing someone
everybody nowhere no one

*but* any one of us may stay; every one of the pilots is responsible; every body was accounted for

6.13. Print compound personal pronouns as one word.

herself oneself yourself
himself ourselves yourselves
itself themselves yourselves
myself thyself thyself

6.14. Print as one word compass directions consisting of two points, but use a hyphen after the first point when three points are combined.

northeast north-northeast
southwest south-southwest

*also* north-south alignment

**Unit modifiers**

6.15. Print a hyphen between words, or abbreviations and words, combined to form a unit modifier immediately preceding the word modified, except as indicated in rule 6.16 and elsewhere throughout this chapter. This applies particularly to combinations in which one element is a present or past participle.

agreed-upon standards Federal-State-local cooperation
Baltimore-Washington road German-English descent
collective-bargaining talks guided-missile program
contested-election case hearing-impaired class
contract-bar rule high-speed line
cost-of-living increase large-scale project
drought-stricken area law-abiding citizen
English-speaking nation long-term loan
fire-tested material line-item veto
Compounding Rules

6.16. Where meaning is clear and readability is not aided, it is not necessary to use a hyphen to form a temporary or made compound. Restraint should be exercised in forming unnecessary combinations of words used in normal sequence.

atomic energy power  national defense appropriation
bituminous coal industry  natural gas company
child welfare plan  per capita expenditure
civil rights case  Portland cement plant
civil service examination  production credit loan
durable goods industry  public at large
flood control study  public utility plant
free enterprise system  real estate tax
ground water levels  small businessman
high school student  Social Security pension
elementary school grade  soil conservation measures
income tax form  special delivery mail
interstate commerce law  parcel post delivery
land bank loan  speech correction class
land use program
life insurance company  but no-hyphen rule (readability aided); not no hyphen rule
mutual security funds

6.17. Print without a hyphen a compound predicate (either adjective or noun) whose second element is a present participle.

The duties were price fixing.  The shale was oil bearing.
The effects were far reaching.  The area is used for beet raising.
### 6.18. Print without a hyphen a compound predicate adjective the second element of which is a past participle. Omit the hyphen in a predicate modifier of comparative or superlative degree.

<table>
<thead>
<tr>
<th>Example</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>The area is drought stricken.</td>
<td>This material is fire tested.</td>
</tr>
<tr>
<td>The paper is fine grained.</td>
<td>The cars are higher priced.</td>
</tr>
<tr>
<td>Moderately fine grained wood.</td>
<td>The reporters are better informed.</td>
</tr>
</tbody>
</table>

### 6.19. Print without a hyphen a two-word modifier the first element of which is a comparative or superlative.

<table>
<thead>
<tr>
<th>Example</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>better drained soil</td>

<tr>
<td>lower income group</td>
<td>higher-than-market price</td>
</tr>
</tbody>
</table>

### 6.20. Do not use a hyphen in a two-word unit modifier the first element of which is an adverb ending in *ly*, nor use hyphens in a three-word unit modifier the first two elements of which are adverbs.

<table>
<thead>
<tr>
<th>Example</th>
<th>Example</th>

</tr>
<tr>
<td>most often heard phrase</td>

</tr>
</tbody>
</table>

### 6.21. Proper nouns used as unit modifiers, either in their basic or derived form, retain their original form; but the hyphen is printed when combining forms.

<table>
<thead>
<tr>
<th>Example</th>
<th>Example</th>

<tbody>
<tr>

6.23. Where two or more hyphenated compounds have a common basic element but this element is omitted in all but the last term, the hyphens are retained.

- 2- to 3- and 4- to 5-ton trucks
- 2- by 4-inch boards, but boards 2 to 6 inches wide
- 8-, 10-, and 16-foot boards

“blue sky” law  but  “good neighbor” policy  right-to-work law  “tie-in” sale  line-item veto

6.27. Print combination color terms as separate words, but use a hyphen when such color terms are unit modifiers.

6.32. Use a hyphen or hyphens to prevent mispronunciation, to ensure a definite accent on each element of the compound, or to avoid ambiguity.

7. Compounding Examples

7.1. The following examples are based on the rules for compounding found in chapter 6. Obviously, this list or any other list of compound words could not possibly be a complete reference due to sheer volume. However, an analogy of the words listed with like prefixes and suffixes together with an application of the rules will result in easier handling of those compound words not listed.

7.2. In order to keep the list from becoming cumbersome, certain restrictions had to be adopted.

7.3. The listing of hyphenated compounds ending in *ed* was kept to a minimum. The rationale was to provide one or two examples under a keyword rather than needless repetition.

7.4. Similarly, many two-word forms which create no difficulty were omitted.

7.5. Care was exercised to achieve fuller coverage of solid compounds, particularly when the adopted form is different than that of Webster’s Third New International Dictionary. This dictionary is GPO’s guide for spelling with the exception of those words listed in rule 5.2. It is not GPO's guide to compounding.

7.6. A distinction exists between words used in a literal sense and a nonliteral sense. With few exceptions, one-word forms usually express a nonliteral interpretation, while two-word forms invariably convey a literal meaning. For example, a person may have an interesting *sideline* or hobby, but be forced to sit on the *side line* during periods of inactivity.

7.7. Distinction should also be made in the compounding of two words to form an adjective modifier and the use of the same words as a predicate adjective; e.g., “crystal-clear water,” *but* “the water is crystal clear”; “fire-tested material,” *but* “the material is fire tested.”
7.8. Caution should be exercised when distinguishing whether a succession of words is being used as a compound or whether they simply appear together. Consider, for example, “We know someone should do it and who that some one ought to be.”

7.9. For better appearance, it may sometimes be necessary to treat alike words that would have different forms when they appear separately; e.g., bumblebee and queen bee, farmhand and ranch hand. In juxta-position, these and similar words should be made uniform by being printed as two words. This is only a temporary expedient and does not supersede the list.

7.10. Combining forms and prefixes are usually printed solid. For greater readability, the hyphen is sometimes used to avoid doubling a vowel (anti-inflation, naso-orbital); to facilitate a normally capitalized word (mid-April, non-European); to assure distinct pronunciation of each element of a compound or ready comprehension of intended meaning (contra-ion, un-ionized); or to join a combining form or prefix to a hyphenated compound (equi-gram-molar, pro-mother-in-law).

7.11. As nouns and adjectives, holdup, calldown, layout, makeup, and similar words should be printed solid. Their er derivatives, (holder-up, caller-down, layer-out, and maker-up) require hyphens. Such compounds as run-in, run-on, and tie-in resist quick comprehension when solid. They are therefore hyphenated.

7.12. Words spelled alike but pronounced differently, such as tear-dimmed and tearsheet, wind tunnel and windup, are listed under the same keyword.

7.13. Words printed flush in the following list combine with the words which follow to indicate solid or hyphenated compounds. A space-mark (#) appearing before an indented entry indicates a two-word form, but two-word forms appearing in the adjective position usually take a hyphen.

7.14. To indicate word function, several abbreviations have been appended. They are: adv., adverb; n., noun; v., verb; u.m., unit modifier; pref., prefix; c.f., combining form; and conj., conjunction.

8. Punctuation

8.1. Punctuation is used to clarify the meaning of written or printed language. Well-planned word order requires a minimum of punctuation. The trend toward less punctuation calls for skillful phrasing to avoid ambiguity and to ensure exact interpretation. The GPO Style Manual can offer only general rules of text treatment. A rigid design or pattern of punctuation cannot be laid down, except in broad terms. The adopted style, however, must be consistent and based on sentence structure.

8.2. The general principles governing the use of punctuation are: If it does not clarify the text it should be omitted; and, in the choice and placing of punctuation marks, the sole aim should be to bring out more clearly the author’s thought. Punctuation should aid reading and prevent misreading.

Apostrophes and possessives

8.3. The possessive case of a singular or plural noun not ending in s is formed by adding an apostrophe and s. The possessive case of a singular or plural noun ending in s or with an s sound is formed by adding an apostrophe only. Some irregular plurals require both an apostrophe and an s. (For possessives of italicized nouns, see rule 11.6.)

- boss’, bosses’
- child’s, children’s
- citizen’s, citizens’
- Congress’, Congresses’
- criterion’s, criteria’s
- Co.’s, Cos.’
- erratum’s, errata’s
- hostess’, hostesses’
- lady’s, ladies’

- man’s, men’s
- medium’s, media’s
- people’s, peoples’
- Essex’s, Essexes’
- Jones’, Joneses’
- Jesus’
- Mars’
- Dumas’
- Schmitz’

8.4. In compound nouns, the ‘s is added to the element nearest the object possessed.

- comptroller general’s decision
- attorneys general’s appointments
- Mr. Brown of New York’s motion
- attorney at law’s fee
- John White, Jr.’s (no comma) account
8.5. Joint possession is indicated by placing an apostrophe on the last element of a series, while individual or alternative possession requires the use of an apostrophe on each element of a series.

soldiers and sailors’ home  editor’s or proofreader’s opinion
Brown & Nelson’s store  Clinton’s or Bush’s administration
men’s, women’s, and children’s clothing  Mrs. Smith’s and Mrs. Allen’s children
St. Michael’s Men’s Club  the Army’s and the Navy’s work
master’s and doctor’s degrees

8.6. In the use of an apostrophe in firm names, the names of organizations and institutions, the titles of books, and geographic names, the authentic form is to be followed. (Note use of “St.”)

Masters, Mates & Pilots’ Association  Johns Hopkins University
Dentists’ Supply Co. of New York  Hinds’ Precedents
International Ladies’ Garment Workers’ Union  Harpers Ferry
Court of St. James’s  Hells Canyon
St. Peter’s Church  Reader’s Digest
St. Elizabeths Hospital  Actor’s Equity Association
but Martha’s Vineyard

8.7. Generally, the apostrophe should not be used after names of countries and other organized bodies ending in s, or after words more descriptive than possessive (not indicating personal possession), except when plural does not end in s.

United States control  teachers college
United Nations meeting  merchants exchange
Southern States industries  children’s hospital
Massachusetts laws  Young Men’s Christian Association
Bureau of Ships report  but
House of Representatives session  Veterans’ Administration
Teamsters Union  (now Department of Veterans Affairs)
editors handbook  Congress’ attitude
syrup producers manual
technicians guide

8.8. Possessive pronouns do not take an apostrophe.

its  yours
ours  hers
theirs  whose
8.9. Possessive indefinite or impersonal pronouns require an apostrophe.

- each other’s books
- some others’ plans
- one’s home is his castle

8.10. The singular possessive case is used in such general terms as the following:

- author’s alterations
- confectioner’s sugar
- cow’s milk
- distiller’s grain
- fuller’s earth
- miner’s inch
- printer’s ink
- traveler’s checks
- writer’s cramp

8.11. While an apostrophe is used to indicate possession and contractions, it is not generally necessary to use an apostrophe simply to show the plural form of most acronyms, initialisms, or abbreviations, except where clarity and sense demand such inclusion.

\textit{8.13.} The plural of spelled-out numbers, of words referred to as words, and of words containing an apostrophe is formed by adding \textit{s} or \textit{es}; but \textit{’s} is added to indicate the plural of words used as words if omission of the apostrophe would cause difficulty in reading.

12 days’ labor \quad \text{for pity’s sake}
2 hours’ traveltime \quad \text{several billion dollars’ worth}

\textit{8.15.} The possessive case is not used in such expressions as the following, in which one noun modifies another.

day labor (labor by the day) \quad \text{State prison}
quartermaster stores \quad \text{State rights}
8.16. For euphony, nouns ending in *s* or *ce* and followed by a word beginning with *s* form the possessive by adding an apostrophe only.

Ellipses

8.76. Three asterisks (preferred form) or three periods, separated by en spaces, are used to denote an ellipsis within a sentence, at the beginning or end of a sentence, or in two or more consecutive sentences. To achieve faithful reproduction of excerpt material, editors using period ellipses should indicate placement of the terminal period in relation to an ellipsis at the end of a sentence. Note, in the following examples, the additional spacing necessary to clearly define commas and the terminal period when period ellipses are employed.

The Senate having tried Andrew Johnson, President of the United States, upon articles of impeachment exhibited against him by the House of Representatives, and two-thirds of the Senators present not having found him guilty of the charges contained in the second, third, and eleventh articles of impeachment, it is therefore

*Ordered and adjudged.* That the said Andrew Johnson, President of the United States be, and he is, acquitted of the charges in said articles made and set forth.

The Senate having tried Andrew Johnson * * * upon articles of impeachment * * * and two-thirds of the Senators present not having found him guilty of the charges * * *, it is therefore

8.78. When periods are not specifically requested for ellipses in copy that has both periods and asterisks, asterisks will be used.

8.79. A line of asterisks indicates an omission of one or more entire paragraphs. In 26½-pica or wider measure, a line of “stars” means seven asterisks indented 2 ems at each end of the line, with the remaining space divided evenly between the asterisks. In measures less than 26½ picas, five asterisks are used. Quotation marks are not used on a line of asterisks in quoted matter. Where an ellipsis line ends a complete quotation, no closing quote is used.

* * * * * * * * *
8.80. Indented matter in 26½-pica or wider measure also requires a seven-asterisk line to indicate the omission of one or more entire paragraphs.

8.81. If an omission occurs in the last part of a paragraph immediately before a line of asterisks, three asterisks are used, in addition to the line of asterisks, to indicate such an omission.

8.82. Equalize spacing above and below an ellipsis line.

8.99. If both a figure and a letter in parentheses are used before each paragraph, a period and an en space are used after the closing parenthesis. If the figure is not repeated before each letter in parentheses but is used only before the first letter, the period is placed after the figure. However, if the figure is not repeated before each letter in parentheses and no period is used, space is inserted after the number if at least one other lettered subsection appears.

15(a). When the figure is used before the letter in each paragraph—
15(b). The period is placed after the closing parenthesis.

9. Abbreviations and Letter Symbols

9.1. Abbreviations and letter symbols are used to save space and to avoid distracting the reader by use of repetitious words or phrases.

9.2. The nature of the publication governs the extent to which abbreviations are used. In the text of technical and legal publications, and in parentheses, brackets, footnotes, sidenotes, tables, leaderwork, and bibliographies, many words are frequently abbreviated. Heads, legends, tables of contents, and indexes follow the style of the text.

9.3. Internal and terminal punctuation in symbols representing units of measure are to be omitted to conform with practice adopted by scientific, technical, and industrial groups. Where the omission of terminal punctuation causes confusion; e.g., the symbol \(\text{in}\) (inch) mistaken for the preposition \(\text{in}\), the symbol should be spelled out.

9.4. Standard and easily understood forms are preferable, and they should be uniform throughout a job. Abbreviations not generally known should be followed in the text by the spelled-out forms in parentheses the first time they occur; in tables and leaderwork such explanatory matter should be supplied in a footnote. As the printer cannot rewrite the copy, the author should supply these explanatory forms.

9.5. In technical matter, symbols for units of measure should be used only with figures; similarly, many other abbreviations and symbols should not appear in isolation. For example, energy is measured in foot-pounds, NOT energy is measured in ft•lbs.

Capitals, hyphens, periods (points), and spacing

9.6. In general, an abbreviation follows the capitalization and hyphenation of the word or words abbreviated. It is followed by a period unless otherwise indicated.

\text{c.o.d.} \quad \text{St.} \quad \text{but ft•lb}
9.7. Abbreviations and initials of a personal name with points are set without spaces. Abbreviations composed of contractions and initials or numbers, will retain space.

A.D., B.C.    AT&T
e.s.t.    Texas A&M
de, e.g. (but op. cit.)    R&D

9.8. Except as otherwise designated, points and spaces are omitted after initials used as shortened names of governmental agencies and of other organized bodies. “Other organized bodies” shall be interpreted to mean organized bodies that have become popularly identified with a symbol, such as MIT (Massachusetts Institute of Technology), GM (General Motors), GMAC (General Motors Acceptance Corp.), etc. (See “List of Abbreviations.”) Symbols, when they appear in copy, may be used for acts of Congress. Example: ARA (Area Redevelopment Act).

Geographic terms

9.9. United States must be spelled out when appearing in a sentence containing the name of another country. **United States military titles and abbreviations**

**Officer rank**

Officer ranks in the United States military consist of commissioned officers and warrant officers. The commissioned ranks are the highest in the military. These officers hold presidential commissions and are confirmed at their ranks by the Senate. Army, Air Force, and Marine Corps officers are called company grade officers in the pay grades of O–1 to O–3, field grade
officers in pay grades O–4 to O–6, and general officers in pay grades O–7 and higher. The equivalent officer groupings in the Navy are called junior grade, mid-grade, and flag.

Warrant officers hold warrants from their service secretary and are specialists and experts in certain military technologies or capabilities. The lowest ranking warrant officers serve under a warrant, but they receive commissions from the President upon promotion to chief warrant officer 2. These commissioned warrant officers are direct representatives of the President of the United States. They derive their authority from the same source as commissioned officers but remain specialists, in contrast to commissioned officers, who are generalists. There are no warrant officers in the Air Force.

**Enlisted rank**

Service members in pay grades E–1 through E–3 are usually either in some kind of training status or on their initial assignment. The training includes the basic training phase where recruits are immersed in military culture and values and are taught the core skills required by their service component.

Basic training is followed by a specialized or advanced training phase that provides recruits with a specific area of expertise or concentration. In the Army and Marines, this area is called a military occupational specialty; in the Navy it is known as a rate; and in the Air Force it is simply called an Air Force specialty.

Leadership responsibility significantly increases in the mid-level enlisted ranks. This responsibility is given formal recognition by use of the terms noncommissioned officer and petty officer. An Army sergeant, an Air Force staff sergeant, and a Marine corporal are considered NCO ranks. The Navy NCO equivalent, petty officer, is achieved at the rank of petty officer third class.
At the E–8 level, the Army, Marines, and Air Force have two positions at the same pay grade. Whether one is, for example, a senior master sergeant or a first sergeant in the Air Force depends on the person’s job. The same is true for the positions at the E–9 level. Marine Corps master gunnery sergeants and sergeants major receive the same pay but have different responsibilities. E–8s and E–9s have 15 to 30 years on the job, and are commanders’ senior advisers for enlisted matters.

A third E–9 element is the senior enlisted person of each service. The sergeant major of the Army, the sergeant major of the Marine Corps, the master chief petty officer of the Navy, and the chief master sergeant of the Air Force are the spokespersons of the enlisted force at the highest levels of their services.

Acronyms and coined words

9.48. To obtain uniform treatment in the formation of acronyms and coined words, apply the formulas that follow:

Use all capital letters when only the first letter of each word or selected words is used to make up the symbol:

- APPR (Army package power reactor)
- EPCOT (Experimental Prototype Community of Tomorrow)
- MAG (Military Advisory Group)
- MIRV (multiple independently targetable reentry vehicle)
- SALT (strategic arms limitation talks); (avoid SALT talks)
- STEP (supplemental training and employment program)

Use all capital letters where first letters of prefixes and/or suffixes are utilized as part of established expressions:

- CPR (cardiopulmonary resuscitation)
- ESP (extrasensory perception)
- FLIR (forward-looking infrared)

Copy must be followed where an acronym or abbreviated form is copyrighted or established by law:

- ACTION (agency of Government; not an acronym)
- MarAd (Maritime Administration)
- NACo (National Association of Counties)
- MEDLARS (Medical Literature Analysis and Retrieval System)

Use caps and lowercase when proper names are used in shortened form, any word
of which uses more than the first letter of each word:

Conrail (Consolidated Rail Corporation)
Pepco (Potomac Electric Power Co.)
Inco (International Nickel Co.)
Aramco (Arabian-American Oil Co.)
Unprofor (United Nations Protection Force)

Use lowercase in common-noun combinations made up of more than the first letter of lowercased words:

loran (long-range navigation)
sonar (sound navigation ranging)
secant (separation control of aircraft by nonsynchronous techniques)

9.49. The words *infra* and *supra* are not abbreviated.

**Terms of measure**

9.50. Compass directions are abbreviated as follows:

<table>
<thead>
<tr>
<th>N.</th>
<th>S.</th>
<th>ESE.</th>
</tr>
</thead>
<tbody>
<tr>
<td>NE.</td>
<td>NNW.</td>
<td>10° N. 25° W.</td>
</tr>
<tr>
<td>E.</td>
<td>W.</td>
<td>NW. by N. ¼ W.</td>
</tr>
<tr>
<td>SW.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

9.51. The words *latitude* and *longitude*, followed by figures, are abbreviated in parentheses, brackets, footnotes, sidenotes, tables, and leaderwork, and the figures are always closed up.

lat. 52°33’05” N. long. 13°21’10” E.

9.52. Avoid breaking latitude and longitude figures at end of line; space out line instead. In case of an unavoidable break at end of line, use hyphen.

9.53. Temperature and gravity are expressed in figures. When the degree mark is used, it must appear closed up to the capital letter, not against the figures. Note the following related abbreviations and letter symbols and their usages:

| abs, absolute | API, American Petroleum |
| Bé, Baumé | Institute |
| °C,¹ degree Celsius ² | Twad, Twaddell |
| °F, degree Fahrenheit | 100 °C |
| °R, degree Rankine | 212 °F ¹ |
| K, kelvin | 671.67 °R |
| 273.15 K | 18 °API |
| °API | |

¹Without figures preceding it, °C or °F should be used only in boxhead and over figure columns in tables.
²Preferred form (superseding Centigrade).
9.54. References to meridian in statements of time are abbreviated as follows:

10 a.m. (not 10:00 a.m.) 12 p.m. (12 noon)
2:30 p.m. 12 a.m. (12 midnight)

9.55. The word o’clock is not used with abbreviations of time.

9.56. Metric unit letter symbols are set lowercase roman unless the unit name has been derived from a proper name, in which case the first letter of the symbol is capitalized (for example Pa for pascal and W for watt). The exception is the letter L for liter. The same form is used for singular and plural. The preferred symbol for cubic centimeter is \( cm^3 \); use \( cc \) only when requested.

A space is used between a figure and a unit symbol except in the case of the symbols for degree, minute, and second of plane angle.

10. Signs and Symbols

10.1. The increased use of signs and symbols and their importance in technical and scientific work have emphasized the necessity of standardization on a national basis and of the consistent use of the standard forms.

10.2. Certain symbols are standardized—number symbols (the digits, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9); letter symbols (the letters of the alphabet, a, b, c, d, etc.); and graphic symbols (the mathematical signs +, −, ±, ×, ÷).

10.3. The signs +, −, ±, ×, and ÷, etc., are closed against accompanying figures and symbols. When the × is used to indicate “crossed with” (in plant or animal breeding) or magnification, it will be separated from the accompanying words by a space.

\[
i–vii+1–288 \text{ pages} \quad \text{Early June} \times \text{Bright (crossed with)}
\]
\[
The \text{equation} \ A+B \quad \times 4 \quad \text{(magnification)}
\]
\[
The \text{result is} \ 4\times4 \quad \text{miles ÷ gallons}
\]
\[
20,000±5,000
\]

Symbols with figures

10.4. In technical publications the degree mark is used in lieu of the word degree following a figure denoting measurement.

10.5. Following a figure, the spelled form is preferred. The percent symbol is used in areas where space will not allow the word percent to be used.

In that period the price rose 12, 15, and 19 percent.

not In that period the price rose 12 percent, 15 percent, and 19 percent.

10.6. Any symbol set close up to figures, such as the degree mark, number mark, dollar mark, or cent mark, is used before or after each figure in a group or series.

\[
\begin{align*}
&\text{§5 to §8 price range} \\
&\text{5′–7′ long, not 5–7′ long} \\
&\text{3¢ to 5¢ (no spaces)} \\
&\pm2 \text{ to } \pm7; 2°\pm1° \\
&\text{#61 to #64}
\end{align*}
\]

\[
\begin{align*}
&\text{but} \\
&\text{§12 (thin space)} \\
&\text{¶1951 (thin space)} \\
&\text{from 15 to 25 percent} \\
&45 \text{ to } 65 ^\circ F \text{ not } 45^\circ \text{ to } 65^\circ F
\end{align*}
\]
Letter symbols

10.7. Letter symbols are set in italic (see rule 10.8) or in roman (see rule 9.56) without periods and are capitalized only if so shown in copy, since the capitalized form may have an entirely different meaning.

Equations

10.8. In mathematical equations, use italic for all letter symbols—capitals, lowercase, small capitals, and superiors and inferiors (exponents and subscripts); use roman for figures, including superiors and inferiors.

10.9. If an equation or a mathematical expression needs to be divided, break before +, −, =, etc. However, the equal sign is to clear on the left of other beginning mathematical signs.

10.10. A short equation in text should not be broken at the end of a line. Space out the line so that the equation will begin on the next line; or better, center the equation on a line by itself.

10.11. An equation too long for one line is set flush left, the second half of the equation is set flush right, and the two parts are balanced as nearly as possible.

10.12. Two or more equations in a series are aligned on the equal signs and centered on the longest equation in the group.

10.13. Connecting words of explanation, such as hence, therefore, and similarly, are set flush left either on the same line with the equation or on a separate line.

10.14. Parentheses, braces, brackets, integral signs, and summation signs should be of the same height as the mathematical expressions they include.

10.15. Inferiors precede superiors if they appear together; but if either inferior or superior is too long, the two are aligned on the left.
### Chemical symbols

10.16. The names and symbols listed below are approved by the International Union of Pure and Applied Chemistry. They are set in roman without periods.

1 Standard letter symbols used by the Geological Survey on geologic maps. Capital letter indicates the system and one or more lowercased letters designate the formation and member where used.
11. Italic

(See also Chapter 9 “Abbreviations and Letter Symbols” and Chapter 16 “Datelines, Addresses, and Signatures”)

11.1. Italic is sometimes used to differentiate or to give greater prominence to words, phrases, etc. However, an excessive amount of italic defeats this purpose and should be restricted.

Emphasis, foreign words, and titles of publications

11.2. Italic is not used for mere emphasis, foreign words, or the titles of publications.

11.3. In nonlegal work, ante, post, infra, and supra are italicized only when part of a legal citation. Otherwise these terms, as well as the abbreviations id., ibid., op. cit., et seq., and other foreign words, phrases, and their abbreviations, are printed in roman.

11.4. When “emphasis in original,” “emphasis supplied,” “emphasis added,” or “emphasis ours” appears in copy, it should not be changed; but “underscore supplied” should be changed to “italic supplied.” Therefore, when emphasis in quoted or extracted text is referred to by the foregoing terms, such emphasized text must be reflected and set in italic.

11.5. When copy is submitted with instructions to set “all roman (no italic),” these instructions will not apply to Ordered, Resolved, Be it enacted, etc.; titles following signatures or addresses; or the parts of datelines that are always set in italic.

Names of aircraft, vessels, and spacecraft

11.6. The names of aircraft, vessels, and manned spacecraft are italicized unless otherwise indicated. In lists set in columns and in stubs and reading columns of tables consisting entirely of such names, they will be set in roman. Missiles and rockets will be set in caps and lowercase and will not be italicized.
SS America; the liner America  
the Bermuda Clipper  
USS Los Angeles (submarine)  
USS Wisconsin  
ex-USS Savannah  
USCGS (U.S. Coast and Geodetic Survey) ship Pathfinder  
C.S.N. Virginia  
CG cutter Thetus  
the U–7

H.M.S. Hornet  
HS (hydrofoil ship) Denison  
MS (motorship) Richard  
GTS (gas turbine ship) Alexander  
NS (nuclear ship) Savannah  

MV (motor vessel) Havtroll  
Apollo 13, Atlantis (U.S. spaceships)  
West Virginia class or type  
the Missouri’s (roman “s”) turret  
the U–7’s (roman “s”) deck  

**11.7.** Names of vessels are quoted in matter printed in other than lowercase roman, even if there is italic type available in the series.

_Sinking of the “Lusitania”_  
_Sinking of the “Lusitania”_

**Names of legal cases**

**11.8.** The names of legal cases are italicized, except for the _v._, which is always set in lowercase. When requested, the names of such cases may be set in roman with an italic _v_. In matter set in italic, legal cases are set in roman with the _v_. being set roman.

_“The Hornet” and “The Hood,”_  
124 F.2d 45  
_Smith v. Brown et al._  
_Smith Bros. case (172 App._  
_Div. 149)_  
_Smith Bros. case, supra_  
_Smith Bros. case_  
As cited in _Smith Bros._  

_But_ John Doe against Richard Roe,  
the _Cement_ case.
Scientific names
11.9. The scientific names of genera, subgenera, species, and subspecies (varieties) are italicized but are set in roman in italic matter; the names of groups of higher rank than genera (phyla, classes, orders, families, tribes, etc.) are printed in roman.

*A.s. perpallidus*
*Dorothia? sp. (roman “?”)*
*Tsuga canadensis*
*Cypripedium parviflorum var. pubescens*
the genera *Quercus* and *Liriodendron*
the family *Leguminosae*; the family *Nessiteras rhombopteryx*
*Measurements of specimens of Cyanoderma erythroptera neocara*

11.10. Quotation marks should be used in place of italic for scientific names appearing in lines set in caps, caps and small caps, or boldface, even if there is italic type available in the series.

Words and letters
11.11. The words *Resolved, Resolved further, Provided, Provided, however, Provided further, And provided further,* and *ordered,* in bills, acts, resolutions, and formal contracts and agreements are italicized; also the words *To be continued, Continued on p. —, Continued from p. —,* and *See* and *see also* (in indexes and tables of contents only).

Resolved, That (resolution)
Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That
[To be continued] (centered; no period)
[Continued from p. 3] (centered; no period)
see also Mechanical data (index entry)

11.12. All letters (caps, small caps, lowercase, superiors, and inferiors) used as symbols are italicized. In italic matter, roman letters are used. Chemical symbols (even in italic matter) and certain other standardized symbols are set in roman.

\[n^\text{th degree}; x \text{ dollars} \]
\[D = 0.025V_m^{2.7} = 0.042/G - 1V_m^{2.7} \]
\[5Cu_2S.2(Cu,Fe,Zn)S.2Sb_2S_3O_4 \]
11.13. Letter designations in mathematical and scientific matter, except chemical symbols, are italicized.

11.14. Letter symbols used in legends to illustrations, drawings, etc., or in text as references to such material, are set in italic without periods and are capitalized if so shown in copy.

11.15. Letters \((a), (b), (c),\) etc., and \(a, b, c,\) etc., used to indicate sections or paragraphs, are italicized in general work but not in laws or other legal documents.

11.16. Internet Web sites and email addresses should be set in roman.
12. Numerals
(See also Chapter 13 “Tabular Work” and Chapter 14 “Leaderwork”)

12.1. Most rules for the use of numerals are based on the general prin-
ciple that the reader comprehends numerals more readily than
numerical word expressions, particularly in technical, scientific, or
statistical matter. However, for special reasons, numbers are spelled
out in certain instances, except in FIC & punc. and Fol. Lit. matter.

12.2. The following rules cover the most common conditions that require
a choice between the use of numerals and words. Some of them,
however, are based on typographic appearance rather than on the
general principle stated above.

12.3. Arabic numerals are preferable to Roman numerals.

Numbers expressed in figures
12.4. A figure is used for a single number of 10 or more with the exception
of the first word of the sentence. (See also rules 12.9 and 12.23.)

50 ballots  24 horses  nearly 13 buckets
10 guns  about 40 men  10 times as large

Numbers and numbers in series
12.5. When 2 or more numbers appear in a sentence and 1 of them is
10 or larger, figures are used for each number. (See supporting rule
12.6.)

Each of 15 major commodities (9 metal and 6 nonmetal) was in supply.
but Each of nine major commodities (five metal and four nonmetal) was in supply.
Petroleum came from 16 fields, of which 8 were discovered in 1956.
but Petroleum came from nine fields, of which eight were discovered in 1956.
That man has 3 suits, 2 pairs of shoes, and 12 pairs of socks.
but That man has three suits, two pairs of shoes, and four hats.
Of the 13 engine producers, 6 were farm equipment manufacturers, 6 were
principally engaged in the production of other types of machinery, and 1
was not classified in the machinery industry.
but Only nine of these were among the large manufacturing companies, and only
three were among the largest concerns.
There were three 6-room houses, five 4-room houses, and three 2-room
cottages, and they were built by 20 carpenters. (See rule 12.21.)
There were three six-room houses, five four-room houses, and three two-room cottages, and they were built by nine carpenters.

**but** If two columns of sums of money add or subtract one into the other and one carries points and ciphers, the other should also carry points and ciphers.

At the hearing, only one Senator and one Congressman testified.

There are four or five things that can be done.

### 12.6. Units of Measurement, Time, or Money

A unit of measurement, time, or money (as defined in rule 12.9), which is always expressed in figures, does not affect the use of figures for other numerical expressions within a sentence.

- Each of the five girls earned 75 cents an hour.
- Each of the 15 girls earned 75 cents an hour.
- A team of four men ran the 1-mile relay in 3 minutes 20 seconds.
- This usually requires from two to five washes and a total time of 2 to 4 hours.
- This usually requires 9 to 12 washes and a total time of 2 to 4 hours.
- The contractor, one engineer, and one surveyor inspected the 1-mile road.

**but** There were two six-room houses, three four-room houses, and four two-room cottages, and they were built by nine workers in thirty 5-day weeks. (See rule 12.21.)

### 12.7. Figures for Serial Numbers

- Bulletin 725 290 U.S. 325
- Document 71 Genesis 39:20
- pages 352–357 202–512–0724 (telephone number)
- lines 5 and 6 the year 2001
- paragraph 1 1721–1727 St. Clair Avenue
- chapter 2 *but* Letters Patent No. 2,189,463

### 12.8. Colon Preceding Figures

A colon preceding figures does not affect their use.

- The result was as follows: 12 voted yea, 4 dissented.
- The result was as follows: nine voted yea, seven dissented.

### Measurement and Time

#### 12.9. Units of Measurement and Time

Units of measurement and time, actual or implied, are expressed in figures.

**a. Age:**

- 6 years old a 3-year-old
- 52 years 10 months 6 days at the age of 3 (years implied)
b. Clock time (see also Time):

the 1st [day] of the month (but the last of April or the first [part] of May, not referring to specific days)
in the year 2000 (not 2,000)

In referring to a fiscal year, consecutive years, or a continuous period of 2 years or more, when contracted, the forms 1900–11, 1906–38, 1931–32, 1801–2, 1875–79 are used (but upon change of century, 1895–1914 and to avoid multiple ciphers together, 2000–2001). For two or more separate years not representing a continuous period, a comma is used instead of a dash (1875, 1879); if the word from precedes the year or the word inclusive follows it, the second year is not shortened and the word to is used in lieu of the dash (from 1933 to 1936; 1935 to 1936, inclusive).

In dates, A.D. precedes the year (A.D. 937); B.C. follows the year (254 B.C.); C.E. and B.C.E. follow the year.

d. Decimals: In text a cipher should be supplied before a decimal point if there is no whole unit, and ciphers should be omitted after a decimal point unless they indicate exact measurement.

Ordinal numbers
12.10. Except as indicated in rules 12.11 and 12.19, and also for day preceding month, figures are used in text and footnotes to text for serial ordinal numbers beginning with 10th. In tables, leaderwork, footnotes to tables and leaderwork, and in sidenotes, figures are used at all times. Military units are expressed in figures at all times when not the beginning of a sentence, except Corps. (For ordinals in addresses, see rule 12.13.)

This legislation was passed in the 1st session of the 102d Congress.
He served in the 9th and 10th Congresses.
From the 1st to the 92d Congress.
Their children were in 1st, 2d, 3d, and 10th grades.
We read the 8th and 12th chapters.
*but* The district comprised the first and second precincts.
He represented the first, third, and fourth regions.
The report was the sixth in a series of 14.

12.12. Ordinals and numerals appearing in a sentence are treated according to the separate rules dealing with ordinals and numerals standing alone or in a group. (See rules 12.4, 12.5, and 12.24.)

The fourth group contained three items.
The fourth group contained 12 items.
The 8th and 10th groups contained three and four items, respectively.
The eighth and ninth groups contained 9 and 12 items, respectively.

12.13. Beginning with *10th*, figures are used in text matter for numbered streets, avenues, etc. However, figures are used at all times and *street, avenue*, etc. are abbreviated in sidenotes, tables, leaderwork, and footnotes to tables and leaderwork.

**Punctuation**

12.14. The comma is used in a number containing four or more digits, except in serial numbers, common and decimal fractions, astronomical and military time, and kilocycles and meters of not more than four figures pertaining to radio.

**Chemical formulas**

12.15. In chemical formulas full-sized figures are used before the symbol or group of symbols to which they relate, and inferior figures are used after the symbol.

\[6\text{PbS}\cdot(\text{Ag}_2\text{Cu})_2\text{S}_2\cdot2\text{As}_2\text{S}_3\text{O}_4\]
Numbers spelled out

12.16. Spell out numbers at the beginning of a sentence or head. Rephrase a sentence or head to avoid beginning with figures. (See rule 12.25 for related numbers.)

Five years ago * * *; not 5 years ago * * *
Five hundred fifty men hired * * *; not 550 men hired * * *

12.17. In verbatim testimony, hearings, transcripts, and question-and-answer matter, figures are used immediately following Q. and A. or name of interrogator or witness for years (e.g., 2008), sums of money, decimals, street numbers, and for numerical expressions beginning with 101.

Mr. Birch, Junior. 2008 was a good year.
Mr. Bell. $1 per share was the return. Two dollars in 1956 was the alltime high. Two thousand ten may be another story.
Colonel Davis. 92 cents.
Mr. Smith. 12.8 people.
Mr. Jones. 1240 Pennsylvania Avenue NW., Washington, DC 20004.
Mr. Smith. Ninety-eight persons.
Q. 101 years? But Q. One hundred years?
A. 200 years.
Mr. Smith. Ten-year average would be how much?

12.18. A spelled-out number should not be repeated in figures, except in legal documents. In such instances use these forms:

five (5) dollars, not five dollars (5)
ten dollars ($10), not ten ($10) dollars
12.19. Numbers appearing as part of proper names, used in a hypothetical or inexact sense, or mentioned in connection with serious and dignified subjects such as Executive orders, legal proclamations, and in formal writing are spelled out.

12.20. If spelled out, whole numbers should be set in the following form:

two thousand twenty
one thousand eight hundred fifty
one hundred fifty-two thousand three hundred five
eighteen hundred fifty (serial number)

When spelled out, any number containing a fraction or piece of a whole should use the word “and” when stating the fraction or piece:

sixty-two dollars and four cents
ninety-nine and three-tenths degrees
thirty-three and seventy-five one-hundredths shares

12.21. Numbers below 100 preceding a compound modifier containing a figure are spelled out.

12.22. Indefinite expressions are spelled out.

Words such as *nearly, about, around, approximately,* etc., do not reflect indefinite expressions.

The bass weighed about 6 pounds.
She was nearly 8 years old.

12.23. Except as indicated in rules 12.5 and 12.9, a number less than 10 is spelled out within a sentence.

```
six horses           but
five wells          3½ cans
eight times as large 2½ times or 2.5 times
```

12.24. For typographic appearance and easy grasp of large numbers beginning with *million,* the word *million* or *billion* is used.

The following are guides to treatment of figures as submitted in copy. If copy reads—

```
$12,000,000, change to $12 million

12.25. Related numbers appearing at the beginning of a sentence, separated by no more than three words, are treated alike.

Fifty or sixty more miles away is snowclad Mount Everest.
Sixty and, quite often, seventy listeners responded.
but Fifty or, in some instances, almost 60 applications were filed.

Fractions

12.26. Mixed fractions are always expressed in figures. Fractions standing alone, however, or if followed by of a or of an, are generally spelled out. (See also rule 12.28.)

A comma should not be used in any part of a built-up fraction of four or more digits or in decimals. (See rule 12.9e.)

12.28. Fractions are used in a unit modifier.

### Roman numerals

12.29. A repeated letter repeats its value; a letter placed after one of greater value adds to it; a letter placed before one of greater value subtracts from it; a dashline over a letter denotes multiplied by 1,000.

13. Tabular Work
(See also Chapter 9 “Abbreviations and Letter Symbols” and Chapter 14 “Leaderwork”)

13.1. The object of a table is to present in a concise and orderly manner information that cannot be presented as clearly in any other way.

13.2. Tabular material should be kept as simple as possible, so that the meaning of the data can be easily grasped by the user.

13.3. Tables shall be set without down (vertical) rules when there is at least an em space between columns, except where: (1) In GPO’s judgment down rules are required for clarity; or (2) the agency has indicated on the copy they are to be used. The mere presence of down rules in copy or enclosed sample is not considered a request that down rules be used. The publication dictates the type size used in setting tables. Tabular work in the Congressional Record is set 6 on 7. The balance of congressional tabular work sets 7 on 8.

Abbreviations

13.4. To avoid burdening tabular text, commonly known abbreviations are used in tables. Metric and unit-of-measurement abbreviations are used with figures.

13.5. The names of months (except May, June, and July) when followed by the day are abbreviated.

13.6. The words street, avenue, place, road, square, boulevard, terrace, drive, court, and building, following name or number, are abbreviated. For numbered streets, avenues, etc., figures are used.

13.7. Abbreviate the words United States if preceding the word Government, the name of any Government organization, or as an adjective generally.

13.8. Use the abbreviations RR. and Ry. following a name, and SS, MS, etc., preceding a name.

13.9. Use lat. and long. with figures.

13.10. Abbreviate, when followed by figures, the various parts of publica-
tions, as article, part, section, etc.

13.12. In columns containing names of persons, copy is followed as to abbreviations of given names.

13.13. Periods are not used after abbreviations followed by leaders.

**Bearoff**

13.14. An en space is used for all bearoffs.

13.15. In a crowded table, when down rules are necessary, the bearoff may be reduced in figure columns.

13.16. Fractions are set flush right to the bearoff of the allotted column width, and not aligned.

13.17. Mathematical signs, parentheses, fractions, and brackets are set with a normal bearoff.

**Boxheads**

13.18. Periods are omitted after all boxheads, but a dash is used after any boxhead which reads into the matter following.

13.20. Boxheads are set solid, even in leaded tables.

13.21. Boxheads are centered horizontally and vertically.

Centerheads, flush entries, and subentries

13.25. Heads follow the style of the tables as to the use of figures and abbreviations.

13.26. Punctuation is omitted after centerheads. Flush entries and subentries over subordinate items are followed by a colon (single subentry to run in, preserving the colon), but a dash is used instead of a colon when the entry reads into the matter below.

13.27. In reading columns if the centerhead clears the reading matter below by at least an em, the space is omitted; if it clears by less than an em, a space is used. If an overrun, rule, etc., in another column, or in the same column, creates a blank space above the head, the extra space is not added.

13.28. Units of quantity and years used as heads in reading and figure columns are set in italic with space above but no space below.

Ciphers

13.29. Where the first number in a column or under a cross rule is wholly a decimal, a cipher is added at the left of its decimal point. A cipher used alone in a money or other decimal column is placed in the unit row and is not followed by a period. The cipher repeats in mixed units before decimals unless the group totals.

13.30. In columns containing both dollars and cents, ciphers will be supplied on right of decimal point in the absence of figures.

13.33. Copy is followed in the use of the word None or a cipher to indicate None in figure columns. If neither one appears in the copy, leaders are inserted, unless a clear is specifically requested.
13.34. In columns of figures under the heading £ s d, if a whole number of pounds is given, one cipher is supplied under s and one under d; if only shillings are given, one cipher is supplied under d.

13.35. In columns of figures under Ft In, if only feet are given, supply cipher under In; if only inches are given, clear under Ft; if ciphers are used for None, place one cipher under both Ft and In.

13.36. In any column containing sums of money, the period and ciphers are omitted if the column consists entirely of whole dollars.

**Continued heads**

13.37. In continued lines an em dash is used between the head and the word *Continued*. No period is carried after a continued line.

13.38. Continued heads over tables will be worded exactly like the table heading. Notes above tables are repeated; footnote references are repeated in boxheads and in continued lines.

**Dashes or rules**

13.39. Rules are not carried in reading columns or columns consisting of serial or tracing numbers, but are carried through all figure columns.

13.40. Parallel rules are used to cut off figures from other figures below that are added or subtracted; also, generally, above a grand total.

**Ditto (do.)**

13.41. The abbreviation *do.* is used to indicate that the previous line is being repeated instead of repeating the line, verbatim, over and over. It is used in reading columns only, lowercased and preceded by leaders (6 periods) when there is matter in preceding column. If ditto marks are requested, closing quotes will be used.

13.42. Capitalize *Do.* in the first and last columns. These are indented 1 or 2 ems, depending on the length of the word being repeated, or the width of the column; the situation will determine as it is encountered.
13.43. In mixed columns made up of figure and reading-matter items, *do.* is used only under the latter items.

13.44. *Do.* is not used—

(1) In a figure or symbol column (tracing columns are figure columns);

(2) In the first line under a centerhead in the column in which the centerhead occurs;

(3) Under a line of leaders or a rule;

(4) Under an item italicized or set in boldface type for a specific reason (italic or boldface *do.* is never used; item is repeated);

(5) Under an abbreviated unit of quantity or other abbreviations; or

(6) Under words of three letters or less.

13.45. *Do.* is used, however, under a clear space and under the word *None* in a reading column.

13.46. *Do.* does not apply to a reference mark on the preceding item. The reference mark, if needed, is added to *do.*

13.47. Leaders are not used before *Do.* in the first column or before or after *Do.* in the last column.

13.48. In a first and/or last column 6 ems or less in width, a 1-em space is used before *Do.* In all other columns 6 ems or less in width, six periods are used. Bearoff is not included.

13.49. In a first and/or last column more than 6 ems in width, 2 ems of space are used before *Do.* In all other columns more than 6 ems in width, six periods are used. Bearoff space is not included. If the preceding line is indented, the indention of *Do.* is increased accordingly.

13.50. *Do.* under an indented item in an inside reading column, with or without matter in preceding column, is preceded by six periods which are indented to align with item above.
Dollar mark

13.51. The dollar mark or any other money symbol is placed close to the figure; it is used only at the head of the table and under cross rules when the same unit of value applies to the entire column.

13.52. In columns containing mixed amounts (as money, tons, gallons, etc.), the dollar mark, pound mark, peso mark, or other symbol, as required, is repeated before each sum of money.

13.53. If several sums of money are grouped together, they are separated from the nonmoney group by a parallel rule, and the symbol is placed on the first figure of the separated group only.

Figure columns

13.57. Figures align on the right, with an en space bearoff. There is no bearoff on leaders.

13.58. In a crowded table the bearoff may be reduced in figure columns only. It is preferable to retain the bearoff.

13.59. Figures in parentheses align.

13.60. In double rows of figures in a single column, connected by a dash, a plus, or minus sign, and in dates appearing in the form 9–4–08, the dashes or signs can be aligned.

13.61. Plus or minus signs at the left of figures are placed against the figures regardless of alignment; plus and minus signs at the right of figures are cleared.

13.62. Words and Roman numerals in figure columns are aligned on the right with the figures, without periods.

13.63. Figures (including decimal and common fractions) expressing mixed units of quantity (feet, dollars, etc.) and figures in parentheses are aligned on the right.

13.64. Decimal points are aligned except in columns containing numbers that refer to mixed units (such as pounds, dollars, and percentage) and have irregular decimals.

13.65. It is preferred that all columns in a table consisting entirely of figure columns be centered.

Footnotes and references

13.66. Footnotes to tables are numbered independently from footnotes to text unless requested by committee or department.
13.67. Superior figures are used for footnote references, beginning with 1 in each table.

13.68. If figures might lead to ambiguity (for example, in connection with a chemical formula), asterisks, daggers, or italic superior letters, etc., may be used.

13.69. When items carry several reference marks, the superior-figure reference precedes an asterisk, dagger, or similar character used for reference. These, in the same sequence, precede mathematical signs. A thin space is used to bear off an asterisk, dagger, or similar character.

13.70. Footnote references are repeated in boxheads or in continued lines over tables.

13.71. References to footnotes are numbered consecutively across the page from left to right.

13.72. Footnote references are placed at the right in reading columns and symbol columns, and at the left in figure columns (also at the left of such words as None in figure columns), and are separated by a thin space.

13.73. Two or more footnote references occurring together are separated by spaces, not commas.

13.74. In a figure column, a footnote reference standing alone is set in parentheses and flushed right. In a reading column, it is set at the left in parentheses and is followed by leaders, but in the last column it is followed by a period, as if it were a word. In a symbol column it is set at the left and cleared.

13.75. Numbered footnotes are placed immediately beneath the table. If a sign or letter reference in the heading of a table is to be followed, it is not changed to become the first numbered reference mark. The footnote to it precedes all other footnotes. The remaining footnotes in a table will follow this sequence: footnotes (numbers, letters, or symbols); Note.—; then Source:.

13.76. For better makeup or appearance, footnotes may be placed at the end of a lengthy table. A line reading “Footnotes at end of table.” is supplied.
13.77. If the footnotes to both table and text fall together at the bottom of a page, the footnotes to the table are placed above the footnotes to the text, and the two groups are separated by a 50-point rule flush left; but if there are footnotes to the text and none to the table, the 50-point rule is retained.

13.78. Footnotes to cut-in and indented tables and tables in rules are set full measure, except when footnotes are short, they can be set in 1 em under indented table.

13.79. Footnotes are set as paragraphs, but two or more short footnotes should be combined into one line, separated by not less than 2 ems.

13.80. The footnotes and notes to tables are set solid.

13.81. Footnotes and notes to tables and boxheads are set the same size, but not smaller than 6 point, unless specified otherwise.

13.82. Footnotes to tables follow tabular style in the use of abbreviations, figures, etc.

13.83. In footnotes, numbers are expressed in figures, even at the beginning of a note or sentence.

13.84. If a footnote consists entirely or partly of a table or leaderwork, it should always be preceded by introductory matter carrying the reference number; if necessary, the copy preparer should add an introductory line, such as “1 See the following table.”

13.85. An explanatory paragraph without specific reference but belonging to the table rather than to the text follows the footnotes, if any, and is separated from them or from the table by space.

Fractions

13.86. All fractions are set flush right to the bearoff.

(continued)
13.87. Fractions standing alone are expressed in figures, even at the beginning of a line, but should be spelled out at the beginning of a footnote.

Headnotes

13.88. Headnotes should be set lowercase, but not smaller than 6 point, bracketed, and period omitted at end, even if the statement is a complete sentence; but periods should not be omitted internally if required by sentence structure.

13.89. Headnotes are repeated under continued heads but the word Continued is not added to the headnote.

Indentions and overruns

Subentries

13.90. The indention of subentries is determined by the width of the stub or reading column. Subentries in columns more than 15 ems wide are indented in 2-em units; in columns 15 ems or less, with short entry lines and few overruns, 2-em indentions are also used. All overruns are indented 1 em more.

13.91. Subentries in columns of 15 ems or less are indented in 1-em units. Overruns are indented 1 additional em space.

Total, mean, and average lines

13.92. All total (also mean and average) lines are indented 3 ems. In very narrow stub columns, total lines may be reduced to 1- or 2-em indentions, depending on length of line.

13.93. Where overrun of item above conflicts, the total line is indented 1 em more. Runovers of total lines are also indented 1 additional em space.

13.94. It is not necessary to maintain uniform indeftion of the word Total throughout the same table. The word Total is supplied when not in copy.

### Italic

13.95. Names of vessels and aircraft (except in columns consisting entirely of such names), titles of legal cases (except v. for versus), and certain scientific terms are set in italic. The word “Total” and headings in the column do not affect the application of this rule. In gothic typefaces without italic, quotes are allowed.

13.96. Set “See” and “See also” in roman.

### Leaders

13.97. Leaders run across the entire table except that they are omitted from a last reading column.

13.98. The style of leading is guided by two rules: (1) Tables with a single reading column leader from the bottom line, or (2) tables with any combination of more than one reading or symbol column leader from the top line.
13.99. If leadering from the top line, overruns end with a period.

13.100. A column of dates is regarded as a reading column only if leaders are added; in all other cases it is treated as a figure column.

13.101. In tables with tracing figures on left and right of page, leader from top line.

**Numerals in tables**

13.102. Figures, ordinals, and fractions are used in all parts of a table, except fractions that will be spelled out at the beginning of a footnote.

**Parallel and divide tables are discouraged**

13.103. Parallel tables are set in pairs of pages; beginning on a left-hand page and running across to facing right-hand page, leader from the top line.

13.104. Heads and headnotes center across the pair of pages, with 2-em hanging indentation for three or more lines when combined measure exceeds 30 picas in width. Two-line heads are set across the pair of pages. A single-line head or headnote is divided evenly, each part set flush right and left, respectively. Words are not divided between pages.

13.106. Boxheads are not divided but are repeated, with *Continued* added.

13.107. Tracing figures are carried through from the outside columns of both pages and are set to “leader from the top line.”

13.108. In divide tables that are made up parallel, with stub column repeated, the head and headnote repeat on each succeeding page, with *Continued* added to the head only.

13.109. Tables with tracing figures or stub, or both, repeating on the left of odd pages, are divide tables and not parallel tables. Over such tables the heads are repeated, with *Continued* added.
Reading columns

13.110. Figures or combinations of figures and letters used to form a reading column align on left and are followed by leaders. Do. is not used under such items.

13.111. The en dash is not to be used for to in a reading column; if both occur, change to to throughout.

13.112. Cut-in items following a colon are indented 2 ems.

13.113. A single entry under a colon line should be run in; retain the colon.

13.114. Numerical terms, including numbered streets, avenues, etc., are expressed in figures, even at the beginning of an item.

Symbol columns

13.115. A column consisting entirely of letters, letters and figures, symbols, or signs, or any combination of these, is called a symbol column. It should be set flush left and cleared, except when it takes the place of the stub, it should then be leadered. No closing period is used when such column is the last column. Blank lines in a last column are cleared. Do. is not used in a symbol column.

Tables without rules

13.117. It is preferable to set all tables alike; that is, without either down rules or cross rules and with roman boxheads. When so indicated on copy, by ordering agency, tabular matter may be set without rules, with italic boxheads.

13.118. Column heads over figure columns in 6- or 8-point leaderwork are set in 6-point italic.

13.119. Horizontal rules (spanner) used between a spread or upper level column heading carried over two or more lower level column headings are set continuous and without break, from left to right, between the two levels of such headings.

</tbody>
</table>

13.122. Units of quantity and other words as headings over figure columns are used at the beginning of a table or at the head of a continued page or continued column in a double-up table.

13.123. Over figure columns, units of quantity and other words used as headings, and the abbreviations a.m. and p.m., if not included in the boxheads, are set in italic and are placed immediately above the figures, without periods other than abbreviating periods. In congressional work (gothic), or at any time when italic is not available, these units should be placed in the boxheads in parentheses. Any well-known abbreviation will be used to save an overrun, but if one unit of quantity is abbreviated, all in the same table will be abbreviated. If units change in a column, the new units are set in italic with space above and no space below. The space is placed both above and below only when there is no italic available.

Quoted tabular work

13.124. When a table is part of quoted matter, quotation marks will open on each centerhead and each footnote paragraph, and, if table is end of quoted matter, quotation marks close at end of footnotes. If there are no footnotes and the table is the end of the quotation, quotation marks close at end of last item.
14. **Leaderwork**
(See also Chapter 9 “Abbreviations and Letter Symbols” and Chapter 13 “Tabular Work”)

14.1. Leaderwork is a simple form of tabular work without boxheads or rules and is separated from text by 4 points of space above and below in solid matter or 6 points of space in leaded matter. It consists of a reading (stub) column and a figure column, leadered from the bottom line. It may also consist of two reading columns, aligning on the top line. In general, leaderwork (except indexes and tables of contents, which are set the same style as text) is governed by the same rules of style as tabular work. Unless otherwise indicated, leaderwork is set in 8 point. The period is omitted immediately before leaders.

**Bearoff**

14.2. No bearoff is required at the right in a single reading column.

**Columns**

14.3. A figure column is at least an en quad wider than the largest group of figures but not less than 3 ems in single columns or 2 ems in double-up columns. Total rules are to be the full width of all figure columns.

Continued heads
14.5. The use of continued heads in leaderwork is not necessary.

Ditto (do.)
14.6. The abbreviation *do.* is indented and capitalized in the stub. It is capitalized and cleared in last reading column.

Dollar mark and ciphers
14.7. In a column containing mixed amounts (as money, tons, gallons, etc.) the figures are aligned on the right, and the dollar mark or other symbol is repeated before each sum of money. If several sums of money are grouped and added or subtracted to make a total, they are separated from the nonmoney group by a parallel rule, and the symbol is placed on the first figure of the separated group only.

14.8. If two columns of sums of money add or subtract one into the other and one carries points and ciphers, the other should also carry points and ciphers.

Flush items and subheads
14.9. Flush items clear the figure column.

14.10. Subheads are centered in full measure.
Footnotes
14.11. Footnotes to leaderwork follow the style of footnotes to tables.

14.12. Footnote references begin with 1 in each leadered grouping, and footnotes are placed at the end, separated from it by 4 points of space. Separate notes from matter following by not less than 6 points of space.

14.13. If the leaderwork runs over from one page to another, the footnotes will be placed at the bottom of the leadered material.1

Units of quantity
14.14. Units of quantity or other words over a stub or figure column are set italic.

14.15. The following example shows the style to be observed where there is a short colon line at left. In case of only one subentry, run in with colon line and preserve the colon.

Baltimore & Ohio RR.:

May................................................................. 50,000

Dixie RR.: Freight carried Jan. 1, 1999, including freight carried by
all its subsidiaries..................................................... 1,200
1Livestock not included.

14.16. If there is no colon line, the style is as follows:

Freight carried by the Dixie RR. and the Baltimore & Ohio RR. in
May................................................................. 71,500

14.17. Explanatory matter is set in 6 point under leaders (note omission of period):

.......................................................... .......................................................... ..........................................................
(Name) (Address) (Position)

1 If footnotes to leaderwork and text fall at bottom of page, leaderwork footnotes are placed above text footnotes. The two groups are separated by a 50-point rule.
14.18. In blank forms, leaders used in place of complete words to be supplied are preceded and followed by a space.

Footnotes and reference marks

15.1. Text footnotes follow the style of the text with the exception of those things noted in Chapter 9 “Abbreviations and Letter Symbols.” Footnotes appearing in tabular material follow the guidelines set forth in Chapter 13 “Tabular Work.”

15.2. In a publication divided into chapters, sections, or articles, each beginning a new page, text footnotes begin with 1 in each such division. In a publication without such divisional grouping, footnotes are numbered consecutively from 1 to 99, and then begin with 1 again. However, in supplemental sections, such as appendixes and bibliographies, which are not parts of the publication proper, footnotes begin with 1.

15.3. Copy preparers must see that references and footnotes are plainly marked.

15.4. If a reference is repeated on another page, it should carry the original footnote; but to avoid repetition of a long note, the copy preparer may use the words “See footnote 3 (6, 10, etc.) on p.—.” instead of repeating the entire footnote.

15.5. Unless the copy is otherwise marked: (1) Footnotes to 12-point text are set in 8 point; (2) footnotes to 11-point text are set in 8 point, except in Supreme Court reports, in which they are set in 9 point; (3) footnotes to 10- and 8-point text are set in 7 point.

15.6. Footnotes are set as paragraphs at the bottom of the page and are separated from the text by a 50-point rule, set flush left, with no less than 2 points of space above and below the rule.

15.7. Footnotes to indented matter (other than excerpt footnotes) are set full measure.

15.8. To achieve faithful reproduction of indented excerpt material (particularly legal work) containing original footnotes, these footnotes are also indented and placed at the bottom of the excerpt, separated
by 6 points of space. No side dash is used. Reference numbers are not changed to fit the numbering sequence of text footnotes.

15.9. Footnotes must always begin on the page where they are referenced. If the entire footnote will not fit on the page where it is cited, it will be continued at the bottom of the next page.¹

15.10. Footnotes to charts, graphs, and other illustrations should be placed immediately beneath such illustrative material.

15.11. A cutoff rule is not required between a chart or graph and its footnotes.

15.12. For reference marks use: (1) Roman superior figures, (2) italic superior letters, and (3) symbols. Superior figures (preferred), letters, and symbols are separated from the words to which they apply by thin spaces, unless immediately preceded by periods or commas.

15.13. Where reference figures might lead to ambiguity (for example, in matter containing exponents), asterisks, daggers, etc., or italic superior letters may be used.

15.14. When symbols or signs are used for footnote reference marks, their sequence should be (*) asterisk, (†) dagger, (‡) double dagger, and (§) section mark. Should more symbols be needed, these may be doubled or tripled, but for simplicity and greater readability, it is preferable to extend the assortment by adding other single-character symbols.

15.15. Symbols with established meanings, such as the percent sign (%) and the number mark (#), are likely to cause confusion and should not be used for reference marks.

15.16. To avoid possible confusion with numerals and letters frequently occurring in charts and graphs, it is preferable in such instances to use symbols as reference marks.

¹When a footnote breaks from an odd (right-hand) page to an even (left-hand) page, the word (Continued) is set inside parentheses in italic below the last line of the footnote where the break occurs. A 50-point rule is used above each part of the footnote. When a footnote break occurs on facing pages, i.e., from an even page to an odd page, the (Continued) line is not set, but the 50-point rule is duplicated.
15.17. When items carry several reference marks, the superior-figure reference precedes an asterisk, dagger, or similar character used for reference.

15.18. A superior reference mark follows all punctuation marks except a dash, but it falls inside a closing parenthesis or bracket if applying only to matter within the parentheses or brackets.

15.19. Two or more superior footnote references occurring together are separated by thin spaces.

Indexes and tables of contents

15.20. Indexes and tables of contents are set in the same style as the text, except that See and see also are set in italic.

15.21. Where a word occurs in an index page column, either alone or with a figure, it is set flush on the right. If the word extends back into the leaders, it is preceded by an en space.

</tr>
</tbody>
</table>

15.22. For better appearance, Roman numerals should be set in small caps in the figure columns of tables of contents and indexes.

15.23. In indexes set with leaders, if the page numbers will not fit in the leader line, the first number only is set in that line and the other numbers are overrun. If the entry makes three or more lines and the last line of figures is not full, do not use a period at the end.

If page folios overrun due to an excessive amount of figures

use this form ................................................................. 220, 224, 227, 230, 240

(For examples of item indentions in a reading column of indexes set with leaders, see index in this Manual.)

15.24. Overrun page numbers are indented 3½ ems in measures not over 20 picas and 7 ems in wider measures, more than one line being used if necessary. These indentions are increased as necessary to not less than 2 ems more than the line immediately above or below.

15.25. When copy specifies that all overs are to be a certain number of ems, the runovers of the figure column shall be held in 2 ems more than the specified indentation.

Outlines

15.31. Outlines vary in appearance because there is no one set style to follow in designing them. The width of the measure, the number of levels required for the indentions, and the labeling concept selected to identify each new level all contribute to its individuality.

The following sample outline demonstrates a very basic and structured arrangement. It uses the enumerators listed in rule 8.108 to identify each new indented level.

The enumerators for the first four levels are followed by a period and a fixed amount of space. The enumerators for the second four levels are set in parentheses and followed by the same amount of fixed space.

Each new level indents 2 ems more than the preceding level, and data that runs over to the next line aligns with the first word following the enumerator.
Outline example:
I. Balancing a checkbook
   A. Open your check register
      1. Verify all check numbers
         a. Verify no check numbers were duplicated
         b. Verify no check numbers were skipped
   B. Open your bank statement
      1. Put canceled checks in sequence
      2. Compare amounts on checks to those in register
         a. Correct any mistakes in register
         b. Indicate those check numbers cashed
            (1) Mark off check number on the statement
               (a) Verify amount of check
                  (i) Highlight discrepancies on statement
                     (aa) Enter figures on back
                  (ii) Enter missing check numbers on back with amounts
                     (aa) Identify missing check numbers in register
                     (bb) Verify those check numbers were not cashed previously
16. Datelines, Addresses, and Signatures

16.1. The general principle involved in the typography of datelines, addresses, and signatures is that they should be set to stand out clearly from the body of the letter or paper that they accompany. This is accomplished by using caps and small caps and italic, as set forth below. Other typographic details are designed to ensure uniformity and good appearance. Street addresses and ZIP Code numbers are not to be used. In certain lists that carry ZIP Code numbers, regular spacing will be used preceding the ZIP Code. Certain general instructions apply alike to datelines, addresses, and signatures.

General instructions

16.2. Principal words in datelines, addresses, and titles accompanying signatures are capitalized.

16.3. Mr., Mrs., Miss, Ms., and all other titles preceding a name, and Esq., Jr., Sr., and 2d following a name in address and signature lines, are set in roman caps and lowercase if the name is in caps and small caps or caps and lowercase; if the name is in caps, they are set in caps and small caps, if small caps are available—otherwise in caps and lowercase.

Spacing

16.4. At least 2 points of space should appear between dateline and text or address, address and text, text and signature, or signature and address.

Datelines

16.5. Datelines at the beginning of a letter or paper are set at the right side of the page, the originating office in caps and small caps, the address and date in italic; if the originating office is not given, the address is set in caps and small caps and the date in italic; if only the date is given, it is set in caps and small caps. Such datelines are indented from the right 1 em for a single line; 3 ems and 1 em, successively, for two lines; or 5 ems, 3 ems, and 1 em, successively, for three lines. In measures 30 picas or wider, these indentions are increased by 1 em.
16.6. Congressional hearings:

TUESDAY, JULY 29, 2008

HOUSE OF REPRESENTATIVES
COMMITTEE ON THE JUDICIARY
SUBCOMMITTEE ON IMMIGRATION, CITIZENSHIP, REFUGEES, AND BORDER SECURITY, AND INTERNAL LAW
Washington, DC.

U.S. SENATE

Washington, DC.

CONGRESS OF THE UNITED STATES
JOINT COMMITTEE ON PRINTING
Washington, DC.

1 Normally, dates in House hearings on appropriation bills are set on the right in 10-point caps and small caps.
16.7. Datelines at the end of a letter or paper, either above or below signatures, are set on left in caps and small caps for the address and italic for the date. When the word *dated* is used, dateline is set in roman caps and lowercase.

- May 7, 2008.
- Roanoke, VA.
- Roanoke, VA, July 1, 2008.
- Dated July 1, 2008.

16.8. Datelines in newspaper extracts are set at the beginning of the paragraph, the address in caps and small caps and the date in roman caps and lowercase, followed by a period and a 1-em dash.

Hon. Daniel K. Akaka,
*Chairman, Subcommittee on Oversight of Government Management,*
- the Federal Workforce and the District of Columbia, *U.S. Senate,*
- Washington, DC.
16.12. The name or title forming the first line of the address is set in caps and small caps, but Mr., Mrs., or other title preceding a name, and Esq., Jr., Sr., or 2d following a name, are set in roman caps and lowercase; the matter following is set in italic. The words U.S. Army or U.S. Navy immediately following a name are set in roman caps and lowercase in the same line as the name.

Lt. Gen. Robert L. Van Antwerp, Jr., U.S. Army,
Chief of Engineers.

16.18. Signatures are set at the right side of the page. They are indented 1 em for a single line; 3 ems and 1 em, successively, for two lines; and 5 ems, 3 ems, and 1 em, successively, for three lines. In measures 30 picas or wider, these indentions are increased by 1 em.

Signatures as they appear in copy must be followed in regard to abbreviations.
16.20. If name and title make more than half a line, they are set as two lines.

16.21. Two to eight independent signatures, with or without titles, are aligned on the left, at approximately the center of the measure.

1. Since 1989, the military authorities in Burma have promoted the name Myanmar as a conventional name for their state; this decision was not approved by any sitting legislature in Burma, and the U.S. Government did not adopt the name, which is a derivative of the Burmese short-form name Myamna Nainngandaw.

2. Government currently under power sharing agreement mandated by international mediators.

3. In 1950, the Israel Parliament proclaimed Jerusalem as the capital. The United States does not recognize Jerusalem as the capital and the U.S. Embassy continues to be located in Tel Aviv.

4. Holds no official title, but is de facto Chief of State.

5. In theory, governed by the populace through local councils; in practice, an authoritarian state.

6. No accurate English equivalents.

7. The Law of Succession, July 27, 1947, declared that Spain was constituted a Kingdom.

1 Since 1989 the military authorities in Burma have promoted the name Myanmar as a conventional name for their state; this decision was not approved by any sitting legislature in Burma, and the U.S. Government did not adopt the name, which is a derivative of the Burmese short-form name Myanma Naingngandaw.

2. Responsible authority is the Bank of the Central African States.
3. Since 1989 the military authorities in Burma have promoted the name Myanmar as a conventional name for their state; this decision was not approved by any sitting legislature in Burma, and the U.S. Government did not adopt the name, which is a derivative of the Burmese short-form name Myaungmyaungaw.

* ISO 4217 is the international standard of 3-letter codes used to define names of currencies; it is used in place of currency symbols or names. For more information see www.iso.org/iso/support/faqs/faqs_widely_used_standards/widely_used_standards_other/currency_codes/currency_codes_list-1.htm.

** There is no currency code for Island monies. Guernsey and Jersey are both British crown dependencies, but not part of the United Kingdom. However, the United Kingdom Government is constitutionally responsible for their international representation.

1. At this time, only three countries—Burma, Liberia, and the United States—have not adopted the International System of Units (SI, or metric system) as their official system of weights and measures.
2. Dry measurements are mainly used for measuring grain or fresh produce. Do not confuse dry measure for liquid measure, as they are not the same.
3. The equation for converting temperatures is as follows: °C to °F: multiply by 9, then divide by 5, then add 32; °F to °C: subtract 32, then multiply by 5, then divide by 9.

18. Geologic Terms and Geographic Divisions

Geologic terms

For capitalization, compounding, and use of quotations in geologic terms, copy is to be followed. Geologic terms quoted verbatim from published material should be left as the original author used them; however, it should be made clear that the usage is that of the original author.

Formal geologic terms are capitalized: Proterozoic Eon, Cambrian Period. Structural terms such as arch, anticline, or uplift are capitalized when preceded by a name: Cincinnati Arch, Cedar Creek Anticline, Ozark Uplift. See Chapter 4 geographic terms for more information.

**Physiographic regions**

Physiographic regions are based on terrain texture, rock type, and geologic structure and history. The classification system has three tiers: divisions, which are broken into provinces, and some provinces break further into sections. All names are capitalized, not the class; for graphic see [http://tapestry.usgs.gov/physiogr/physio.html](http://tapestry.usgs.gov/physiogr/physio.html).

19. Congressional Record

Code of laws of the United States and rules for publication of the Congressional Record

Title 44, Section 901. Congressional Record: Arrangement, style, contents, and indexes.—The Joint Committee on Printing shall control the arrangement and style of the Congressional Record, and while providing that it shall be substantially a verbatim report of proceedings, shall take all needed action for the reduction of unnecessary bulk. It shall provide for the publication of an index of the Congressional Record semimonthly during and at the close of sessions of Congress.

Title 44, Section 904. Congressional Record: Maps, diagrams, illustrations.—Maps, diagrams, or illustrations may not be inserted in the Record without the approval of the Joint Committee on Printing.

General rules

The rules governing document work (FIC & punc.) apply to the Congressional Record, except as may be noted herein. The same general style should be followed in the permanent (bound) Record as is used in the daily Record. It is important to be familiar with the exceptions and the forms peculiar to the Record.

Much of the data printed in the Congressional Record is forwarded to the GPO via fiber optic transmission using the captured keystrokes of the floor reporters. Element identifier codes are programmatically inserted, and galley output is accomplished without manual intervention. It is not cost-effective to prepare the accompanying manuscript as per the GPO Style Manual, and it is too time-consuming to update and change the data once it is already in type form. Therefore, the Record is to be FIC & punc. Because of its volume, it is not necessary to stamp the manuscript FIC & punc. However, Record style will be followed, as stated in the following rules:

Daily and permanent Record texts are set in 8-point type on a 9-point body. Extracts are set in 7-point type on an 8-point body.

An F-dash will be used preceding 8-point cap lines in the proceedings of the Senate and House.
All 7-point extracts and poetry will carry 2 points of space above and below unless heads appear, which generate their own space.

All extracts are set 7 point unless otherwise ordered by the Joint Committee on Printing.

Except as noted below, all communications from the President must be set in 8 point, but if such communications contain extracts, etc., the extracts are set in 7 point.

An address of the President delivered outside of Congress or referred to as an extract is set in 7 point.

A letter from the President to the Senate is set in 7 point when any form of treaty is enclosed that is to be printed in the Record in connection therewith. The letter is set in 7 point whether the treaty follows or precedes it or is separated from it by intervening matter.

In all quoted amendments and excerpts of bills and in reprinting bills, the style and manuscript as printed in the bill will be followed.

Except where otherwise directed, profanity, obscene wording, or extreme vulgarisms are to be deleted and a 3-em dash substituted.

All manuscript submitted in a foreign language will not be printed. It will be returned for translation and resubmitted for printing in the next Record.

Extreme caution must be used in making corrections in manuscript, and no important change will be made without proper authorization.

Observe the lists of names of Senators, Representatives, and Delegates, committees of both Houses, and duplicate names. Changes caused by death, resignation, or otherwise must be noted. There is no excuse for error in the spelling of names of Senators, Representatives, or department officials. In case of doubt, the Congressional Directory will be the authority.

Datelines should be followed on Extensions of Remarks. If any question arises as to the proper date to be used, a supervisor must be consulted.

Indented matter in leaderwork will be 1 em only.

Do not write queries on proofs.
Capitalization
(See also Chapter 3 “Capitalization Rules”)

If the name of the Congressional Record is mentioned, it must be set in caps and small caps and never abbreviated, even when appearing in citations, except in extract matter, then cap/lowercase.

The name of a Senator or a Representative preceding his or her direct remarks is set in caps and is followed by a period with equal spacing to be used.

The name of a Senator or a Representative used in connection with a bill or other paper—that is, in an adjectival sense—is lowercased, as the Hawkins bill, the Fish amendment, etc.; but Fish’s amendment, etc.

The names of Members and Members-elect of both Houses of the Congress, including those of the Vice President and Speaker, will be printed in caps and small caps if mention is made of them, except in extract matter.

Deceased Members’ names will be set in caps and small caps in eulogies only on the first day the House or Senate is in session following the death of a Member, in a speech carrying date when the Member was eulogized, or on memorial day in the Senate and House. Eulogy day in one House will be treated the same in the other.

Certificates of Senators-elect of a succeeding Congress are usually presented to the current Congress, and in such cases the names of the Senators-elect must be in caps and small caps.

Names of Members of Congress must be set in caps and lowercase in votes, in lists set in columns, in the list of standing and select committees, in contested-election cases, in lists of pairs, and in all parts of tabular matter (head, body, and footnotes).

Observe that the names of all persons not certified Members of Congress are to be set in caps and lowercase; that is, names of secretaries, clerks, messengers, and others.

Names of proposed Federal boards, commissions, services, etc., are capitalized.
Capitalize principal words and quote after each of the following terms: Address, article, book, caption, chapter heading, editorial, essay, heading, headline, motion picture or play (including TV or radio program), paper, poem, report, song, subheading, subject, theme, etc. Also, following the word entitled, except with reference to bill titles which are treated as follows: “A bill (or an act) transferring certain functions of the Price Administrator to the Petroleum Administrator for War,” etc.

Figures
Follow the manuscript as to the use of numerals. Dollar amounts in Record manuscript are to be followed.

Figures appearing in manuscript as “20 billion 428 million 125 thousand dollars” should be followed.

Tabular matter and leaderwork
Record tables may be set either one or three columns in width, as follows:

One-column table: 14 picas (168 points).

Three-column table: 43½ picas (522 points). Footnote(s) will be set 43½ picas.

All short footnotes should be run in with 2 ems between each.

Italic
Italic, boldface, caps, or small caps shall not be used for emphasis; nor shall unusual indentions be used. This does not apply to literally reproduced quotations from historical, legal, or official documents. If italic other than restricted herein is desired, the words should be underscored and “Fol. ital.” written on each folio. Do not construe this to apply to “Provided,” “Provided further,” “Ordered,” “Resolved,” “Be it enacted,” etc.

Names of vessels must be set in italic, except in headings, where they will be quoted.

The prayer delivered in either House must be set in 8-point roman. If prefaced or followed by a quotation from the Bible, such quotation must be set in 8-point italic. Extracts from the Bible or other literature contained in the body of the prayer will be set in 8-point roman and quoted.
When general or passing mention is made of a case in 8 point, the title is set in roman, as Smith Bros. case. When a specific citation is indicated and reference follows, use italic for title, as Smith Bros. case (172 App. Div. 149).

In 8 point manuscript, titles of cases are always set in italic if followed by references. In 7 point, manuscript is followed.

In 8-point matter, when only the title of a case is given, set in roman, as United States versus 12 Diamond Rings.

When versus is used in other than legal phrases and for the purposes of showing contrast, it is not abbreviated or set in italic, as “airplanes versus battleships.”

**Miscellaneous**

Do not quote any communication carrying date and signature. However, a letter (or other communication) bearing both date and signature that appears within a letter shall be quoted.

Do not put quotation marks on centerheads in 7-point extracts unless centerheads belong to original matter.

In newspaper extracts, insert place and date at beginning of paragraph. Use caps and small caps for name of place and roman lowercase for spelled-out date. Connect date and extract by a period and an em dash. If date and place are credited in a bracket line above extract, they need not be used again at the beginning of the paragraph.

Each Whereas in a preamble must begin a new paragraph. The Therefore be it must be preceded by a colon and be run in with the last Whereas. Be it will run in with the word Therefore, but it must not be supplied when not in manuscript. Note the following:

Whereas it has been deemed advisable to, etc.: Therefore be it

In the titles of legal cases, manuscript is followed as to spelling, abbreviations, and use of figures.

Use single punctuation in citations of cases and statutes:

Indent asterisk lines 2 ems on each side. Use five asterisks.

If a title is used as part of the name of an organization, vessel, etc., spell; thus, General Ulysses S. Grant Post No. 76, Grand Army of the Republic.

The order of subdivision of the Constitution of the United States is as follows: article I, section 2, clause 3.

If an exhibit appears at the end of a speech, the head Exhibit is set in 7-point caps and small caps.

In extracts containing votes the names must be run in, as Mr. Smith of Texas, AuCoin, and Clay, etc.

In a Senator’s or a Representative’s remarks, when amendments, sections, etc., are referred to by number, follow the manuscript.

In text references to Senate and House reports and in executive and miscellaneous documents, follow the manuscript.

In headings and text references to resolutions and memorials, follow the manuscript.

**In gross or en gros**

When a bill comes to final action, in the presentment of amendments collectively for a vote, either the term “in gross” or the French equivalent “en gros” may be used.

PARENTHESES AND BRACKETS

[The use of parentheses and brackets will be followed as submitted for acronyms, symbols, or abbreviations.]

This legislation would exempt certain defined Central Intelligence Agency [CIA] operational files from the search and review process of the Freedom of Information Act [FOIA], thus permitting the Agency to respond much more quickly to those FOIA requests which are at all likely to result in the release of information.

Mr. BACA. Madam Speaker, I now yield 5 minutes to the gentleman from Indiana (Mr. HILL).

(Mr. BUTTERFIELD asked and was given permission to revise and extend his remarks in the Record.)

Ms. HARMAN. There is no “may not” about it. Here is the form in which they are printed.

Mr. DOYLE. I am in hopes we shall be able to secure a vote on the bill tonight.

[“Vote! Vote!”]
Mr. YOUNG. The Chair rather gets me on that question. [Laughter.] I did not rise. [Cries of “Vote! Vote!”]

Mrs. CAPPS [one of the tellers]. I do not desire to press the point that no quorum has voted.

The CHAIRMAN [after a pause]. If no gentleman claims the floor, the Clerk will proceed with the reading of the bill.

Mr. HALL of Texas. Then he is endeavoring to restrict the liberty of the individual in the disbursement of his own money. [Applause on the Republican side.]

Mr. KENNEDY. Mr. Speaker, I desire to ask unanimous consent that the time of the gentleman——[Cries of “Regular Order!”]

[Laughter.]

The SPEAKER. Is there objection to the consideration of this bill at this time? [After a pause.] There is no objection.

The CHAIRMAN [rapping with his gavel]. Debate is exhausted.

Mr. MORAN of Virginia. Patrick Henry said

Ceasar had his Brutus, Charles I his Cromwell, and George III——[here he was interrupted by cries of “Treason, Treason!”]

[Laughter.]

The SPEAKER. Is there objection to the consideration of this bill at this time? [After a pause.] There is no objection.

The CHAIRMAN [rapping with his gavel]. Debate is exhausted.

Mr. MILLER of Florida addressed the Committee [or House]. His remarks will appear hereafter in the Extensions of Remarks.)

[Names of Senators or Representatives appearing in remarks of other Members of Congress should be enclosed in brackets, except in listing of tellers or when some title other than “Mr.” is used, as in the following examples:]

Mr. LIEBERMAN. Mr. President, I thank my friend from Rhode Island [Senator WHITEHOUSE] for that magnificent exchange of correspondence between the Hebrew congregation of Newport, RI, and President Washington.

May I say that Senator WHITEHOUSE, in his own bearing and substance, lives out the promise of religious freedom that our first President gave to all Americans.

Perhaps I should say I say that as one of the descendants of the Stock of Abraham who is privileged to be a Member of the Senate today. I thank Senator WHITEHOUSE. I thank Senator COBURN.

I am going to take the liberty, if I may, to speak for a few minutes while we are waiting for either Senator MURKOWSKI, Senators WEBB or MARTINEZ, who are going to read documents before I conclude.

[In Senate manuscript a Senator is referred to as “the Senator from —— [Mr. ——].” Do not supply name and brackets if name does not appear in manuscript.]

[Note that brackets are used only when Mr., etc., appears in manuscript.]

[See also use of Mr., Mrs., Miss, Ms. in explanation of votes under “Pairs.”]

So (no further count being called for) the amendment of Mr. MORAN of Virginia was not agreed to.

So (two-thirds having voted in favor thereof) the rules were suspended, and the bill was passed.

So (two-thirds not having voted in favor thereof) the motion was rejected.

The CHAIRMAN. The gentleman raises the point of no quorum. The Chair will count. [After counting.]
Two hundred and seventeen present, a quorum. The noes have it, and the amendment is rejected. The question being taken on the motion of Mr. HOYER to suspend the rules and pass the bill, it was agreed to (two-thirds voting in favor thereof). So (the affirmative not being one-fifth of the whole vote) the yeas and nays were not ordered. The question was taken by a viva voice vote, and the Speaker announced that two-thirds appeared to have voted in the affirmative and [after a pause] that the bill was passed. The yeas and nays were ordered, there being 43 in the affirmative, more than one-fifth of the last vote. The question being taken on Mr. KENNEDY’s motion, there were—ayes 18, noes 35. The question being taken on concuring in the amendments of the Senate, there were—ayes 101, noes 5. The question was taken; and on a division [demanded by Mr. HOYER] there were—ayes 17, noes 29. Mr. HOYER. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present. The CHAIRMAN. Evidently a quorum is not present. The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears. Members will record their presence by electronic device. The call was taken by electronic device.

1715

[The above box followed by a four-digit number indicates floor time in the House (5:15 p.m.)]

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated. The Committee will resume its business. The pending business is the demand of the gentleman from Minnesota [Mr. OBERSTAR] for a recorded vote. A recorded vote was refused. So the amendment to the amendment offered as a substitute for the amendment was rejected. The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. ENGLISH] as a substitute for the amendment offered by the gentlewoman from South Dakota [Ms. HERSETH SANDLIN]. The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

SURVEILLANCE SANITY
(By Benjamin Civiletti, Dick Thornburgh
and William Webster)

Following the terrorist attacks of Sept. 11, 2001, President Bush authorized the National Security Agency to target Al Qaeda communications into and out of the country. Mr. Bush concluded that this was essential for protecting the country, that using the Foreign Intelligence Surveillance Act would not permit the necessary speed and agility, and that he had the constitutional power to authorize such surveillance without court orders to defend the country.

Since the program became public in 2006, Congress has been asserting appropriate oversight. Few of those who learned the details of the program have criticized its necessity. Instead, critics argued that if the president found FISA inadequate, he should have gone to Congress and gotten the changes necessary to allow the program to proceed under court orders. That process is now underway. The administration has brought the program under FISA, and the Senate Intelligence Committee recently reported out a bill with a strong bipartisan majority of 13–2, that would make the changes to FISA needed for the program to continue. This bill is now being considered by the Senate Judiciary Committee.

CASEY AT THE BAT
The outlook wasn’t brilliant for the Mudville nine that day;
The score stood four to two, with but one inning more to play.

And then when Cooney died at first, and Barrows did the same,
A pall-like silence fell upon the patrons of the game.
A straggling few got up to go in deep despair.
The rest clung to that hope which springs eternal in the human breast;
They thought, if only Casey could get but a whack at that—
We’d put up even money now, with Casey at the bat.
But Flynn preceded Casey, as did also Jimmy Blake,
And the former was a hoodoo and the latter a cake;
So upon that stricken multitude grim melancholy sat,
For there seemed but little chance of Casey’s getting to the bat.
But Flynn let drive a single, to the wonderment of all,
And Blake, the much despised, tore the cover off the ball;
And when the dust had lifted, and the men saw what had occurred,
There was Jimmy safe at second and Flynn a-hugging third.
Then from five thousand throats and more there rose a lusty yell;
It rumbled through the valley, it rattled in the dell;
It pounded on the mountain and recoiled upon the flat,
For Casey, mighty Casey, was advancing to the bat.
There was ease in Casey’s manner as he stepped into his place;
There was pride in Casey’s bearing and a smile lit Casey’s face.
And when, responding to the cheers, he lightly doffed his hat,
No stranger in the crowd could doubt ’twas Casey at the bat.
Ten thousand eyes were on him as he rubbed his hands with dirt;
Five thousand tongues applauded when he wiped them on his shirt.
Then while the writhing pitcher ground the ball into his hip,
Defiance gleamed in Casey’s eye, a sneer curled Casey’s lip.
And now the leather-covered sphere came hurtling through the air,
And Casey stood a-watching it in haughty grandeur there.

Close by the sturdy batsman the ball unheed ed sped—
“That ain’t my style,” said Casey. “Strike one,” the umpire said.
From the benches, black with people, there went up a muffled roar,
Like the beating of the storm-waves on a stern and distant shore.
“Kill him! Kill the umpire!” shouted somebody on the stand;
And it’s likely they’d a-killed him had not Casey raised his hand.
With a smile of Christian charity great Casey’s visage shone;
He stilled the rising tumult; he bade the game go on;
He signaled to the pitcher, and once more the dun sphere flew;
But Casey still ignored it, and the umpire said, “Strike two.”
“Fraud!” cried the maddened thousands, and echo answered fraud;
But one scornful look from Casey and the audience was awed.
They saw his face grow stern and cold, they saw his muscles strain,
And they knew that Casey wouldn’t let that ball go by again.
The sneer is gone from Casey’s lip, his teeth are clenched in hate;
He pounds with cruel violence his bat upon the plate.
And now the pitcher holds the ball, and now he lets it go,
And now the air is shattered by the force of Casey’s blow.
Oh, somewhere in this favored land the sun is shining bright;
The band is playing somewhere, and somewhere hearts are light,
And somewhere men are laughing, and somewhere children shout;
But there is no joy in Mudville—mighty Casey has struck out.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Our Father in heaven, we thank You for the beautiful differences in the human family, for its varied shapes and sizes, its features and colors, its abilities and talents. Deliver us from the forces that would destroy our unity by eliminating our diversity.

Bless the Members of this body. Help them in their debates to distinguish between substance and semantics, between rhetoric and reality. Free them from personal and partisan preoccupations that would defeat their aspirations and deprive Americans of just and equitable solutions. May our lawmakers avoid the works of darkness and put on Your armor of light.

We pray in Your holy Name. Amen.

20. Reports and Hearings

The data for these publications arrives at GPO from many different sources. Congressional committee staff members are responsible for gathering the information printed in these publications.

Report language is compiled and submitted along with the bill language to the clerks of the respective Houses. The clerks assign the report numbers, etc., and forward this information to GPO for typesetting and printing. In many instances the reports are camera-ready copy, needing only insertion of the assigned report number.

Likewise, hearings are also compiled by committee staff members. The data or captured keystrokes as submitted by the various reporting services are forwarded to GPO where the element identifier codes are programmatically inserted and galley or page output is accomplished without manual intervention. It is not cost effective to prepare the manuscript as per the GPO Style Manual as it is too time-consuming to update and change the data once it is already in type form. Therefore, these publications are to be FIC & punc., unless specifically requested otherwise by the committee. It is not necessary to stamp the copy. However, style as stated in the following rules will be followed.

Style and format of congressional reports

Below are rules that should be followed for the makeup of congressional numbered reports. In either Senate or House reports, follow bill style in extracts from bills. Report numbers run consecutively from first to second session:

1. All excerpts to be set in 10-point type, cut in 2 ems on each side, except as noted in paragraph 3 below. For ellipses in cut-in matter, lines of five stars are used.

2. Contempt proceedings to be considered as excerpts.

3. The following are to be set in 10-point type, but not cut in:
   
   (a) Letters that are readily identified as such by salutation and signature.

   (b) Appendixes and/or exhibits that have a heading readily identifying them as such; and
(c) Matter printed in compliance with the Ramseyer rule.¹

4. All leaderwork and lists of more than six items to be set in 8-point type.

5. All tabular work to be set in 7-point gothic type.

6. An amendment in the nature of a substitute to be set in 8-point type, but quotations from such amendment later in the report to be treated as excerpts, but set full measure (see paragraph 10 below).

7. Any committee print having a report head indicated on original copy to be set in report type and style.

8. Committee prints not having a report head indicated on original copy to be set in committee print style; that is, excerpts to be set in 8 point, full measure.

9. If a committee print set as indicated in paragraph 8 is later submitted as a report or included in a report, and the type is available for pickup, such type shall be picked up and used as is in the report.

10. On matter that is cut in on the left only for purposes of breakdown, no space is used above and below, but on all matter that is cut in on both sides, 4 points are used above and below. Because of the indentions and the limited number of element identifiers, do not squeeze bills that are submitted as excerpts.

11. In reports of immigration cases, set memorandums in full measure unless preceded or followed directly by committee language. Memorandums are indented on both sides if followed by such language. Preparers should indicate the proper indention on copy.

12. Order of printing (Senate reports only): (1) Report, (2) minority or additional views, (3) the Cordon rule, ² (4) appendix (if any).

¹ Ramseyer rule.—House: If report has “Changes in Existing Law” use caps and small caps for heads, except for breakdown within a cap and small cap head.

² Cordon rule.—Senate: If report has “Changes in Existing Law” use small cap heads, except for breakdown within a cap and small cap head.
13. Minority or additional views will begin a new page with 10-point cap heading. In Senate reports, “Changes in Existing Law” begins a new page if following “views.” In conference reports, “Joint Explanatory Statement” begins a new odd page.

14. Minority or additional views are printed only if they have been signed by the authoring congressperson.

[Sample of excerpt]

In *Palmer v. Mass.*, decided in 1939, which involved the reorganization of the New Haven Railroad, the Supreme Court said:

> The judicial processes in bankruptcy proceedings under section 77 are, as it were, brigaded with the administrative processes of the Commission.

[Sample of an excerpt with an added excerpt]

The Interstate Commerce Commission in its report dated February 29, 1956, which is attached hereto and made a part hereof, states that it has no objection to the enactment of S. 3025, and states, in part, as follows:

> The proposed amendment, however, should be considered together with the provisions of section 959(b), title 28, United States Code, which reads as follows:

> “A trustee, receiver, or manager appointed in any cause pending in any court of the United States,” etc.

[Sample of amendment]

On page 6, line 3, strike the words “and the service”, strike all of lines 4, 5, and 6, and insert in lieu thereof the following:

CONFERENCE REPORT

[To accompany H.R. 2669]

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2669), to provide for reconciliation pursuant to section 601 of the concurrent resolution on the budget for fiscal year 2008, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

SECTION 1. SHORT TITLE; REFERENCES.

(a) SHORT TITLE.—This Act may be cited as the “College Cost Reduction and Access Act”.

(b) REFERENCES.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Higher Education Act of 1965 (20 U.S.C. 1001 et seq.).

(c) EFFECTIVE DATE.—Except as otherwise expressly provided, the amendments made by this Act shall be effective on October 1, 2007.
JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2669), to provide for reconciliation pursuant to section 601 of the concurrent resolution on the budget for fiscal year 2008, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment that is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SECTION 1. SHORT TITLE

The House bill’s short title is the “College Cost Reduction Act.”

The Senate amendment provides that the Act may be cited as the “Higher Education Access Act of 2007” and that, unless otherwise indicated, references in the bill are made to the Higher Education Act of 1965.

The House recedes with an amendment to provide a new short title of the “College Cost Reduction and Access Act.” The Conferees adopt the Senate amendment as amended by the House.

TITLE I—GRANTS TO STUDENTS IN ATTENDANCE AT INSTITUTIONS OF HIGHER EDUCATION

SECTION 101. TUITION SENSITIVITY

The House bill (Sec. 101) eliminates the Pell grant “tuition sensitivity” provision that prevents low-income students attending low-cost institutions, such as community colleges, to benefit fully from the Pell Grant. Authorizes and appropriates $5,000,000 for fiscal year 2008.

The Senate amendment (Sec. 101) also eliminates the Pell grant “tuition sensitivity” provision and authorizes and appropriates $5,000,000 for fiscal year 2008.

The House and the Senate recede with an amendment to authorize and appropriate $11,000,000 for fiscal year 2008 to ensure that all eligible students in award year 2007–2008 receive funding. The Conferees concur and adopt the amendment.
COMPLIANCE WITH HOUSE RULE XXI

Pursuant to clause 9 of rule XXI of the Rules of the House of Representatives, this conference report contains no congressional earmarks, limited tax benefits, or limited tariff benefits as defined in clause 9(d), 9(e), or 9(f) of rule XXI.

CATHERN COTTEN, DIRECTOR, INTERNATIONAL OFFICE, DUKE UNI-
VERSITY

JULIE L. MYERS, ASSISTANT SECRETARY, U.S. IMMIGRATION AND
CUSTOMS ENFORCEMENT [ICE], DEPARTMENT OF HOMELAND SECU-
RITY

Mr. Price. Subcommittee will come to order. Good morning, ev-
eryone. Today we will be discussing the wide variety of activities
carried out by Immigration and Customs Enforcement, or ICE, and
we will first focus on the Agency’s Student and Exchange Visitor
Program.

BALANCING SECURITY AND STUDENT NEEDS

Mr. Price. Thank you very much. We will put your entire state-
ment in the record, which of course elaborates on the points you
made and goes beyond them. Let me ask you first a rather broad
question, and then I will zero in somewhat on the fee increases and
the benefits that might accrue from an increased flow of fee rev-

[Note style for questions and answers]

Question. What percentage of cases presented to prosecutors along the Southwest
border are prosecuted? Provide by sector and/or state. What was the prosecution
rate of criminals picked up off the street? (Culberson)

Answer. ICE does not track prosecutions, however, ICE works closely with U.S.
Attorneys and state and local prosecutors nationwide on a wide variety of cases.

ORGANIZATIONAL MEETING ON ADOPTION OF COMMITTEE RULES; CONSIDERATION OF INTERIM REPORT; AND HEARING ON VOTING IN THE HOUSE OF REPRESENTATIVES

THURSDAY, SEPTEMBER 27, 2007

HOUSE OF REPRESENTATIVES
SELECT COMMITTEE TO INVESTIGATE THE VOTING
IRREGULARITIES OF AUGUST 2, 2007

Washington, DC.

The committee met, pursuant to call, at 9:11 a.m., in Room H–313, The Capitol, Hon. William D. Delahunt (Chairman of the committee) presiding.

Present: Representatives Delahunt, Davis, Herseth Sandlin, Pence, LaTourette and Hulshof.

The CHAIRMAN. A quorum being present, the select committee will come to order.

Today we are meeting to do three tasks: adopt our committee rules, adopt the internal report, and to hear for the first time—of what we expect to be multiple occasions—from the Office of the House Clerk. We will wait for the gentlelady from South Dakota, who was at her other select committee.

I now recognize myself for 5 minutes to make an opening statement, but before I do, let me note I will then go to Congressman Pence as the Ranking Member. And in subsequent hearings, it would be our hope that just he and I would make opening statements. But on this initial hearing, any member of the panel that wishes to make an opening statement is most welcome.

I would be remiss not to begin by thanking the Chair of the House Rules Committee, Louise Slaughter, and the Ranking Member, David Dreier, for making their hearing room available to the select committee.

I also want to welcome everyone to this initial meeting of the select committee that has been mandated by the House to review roll call No. 814. I would note that none of the Members sought this particular assignment, but each of us appreciates the role and the significance of the House in our unique constitutional order, and recognize that the integrity of the system by which we cast our votes on the House floor is essential to the confidence that the American people have in this institution, aptly described as the people’s House.
